Consolidated Financial Statements	. 16

RUSSEL METALS INC. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2013

This Management's Discussion and Analysis of Financial Condition and Results of Operations of Russel Metals Inc. and its subsidiaries provides information to assist readers of, and should be read in conjunction with, the condensed consolidated financial statements for the nine months ended September 30, 2013 including the notes thereto, and the Management's Discussion and Analysis and the audited consolidated financial statements for the year ended December 31, 2012, including the notes thereto. In the opinion of management, such condensed consolidated financial statements contain all adjustments necessary for a fair presentation of the results for such periods. The results of operations for the periods shown are not necessarily indicative of what our results will be for the full year. All dollar references in this report are in Canadian dollars unless otherwise stated.

Additional information related to Russel Metals Inc., including our Annual Information Form, may be obtained from SEDAR at www.sedar.com or on our website at www.russelmetals.com.

Unless otherwise stated, the discussion and analysis contained herein are as of November 7, 2013.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this document constitute forward-looking statements or information within the meaning of applicable securities laws. These statements relate to future events or our future performance. All statements other than statements of historical fact may be forward-looking statements. Forward looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. These risks and uncertainties include, among other things: no assurance future financing will be available; dilution; change of control; interest rate risk; foreign exchange risk; volatile metal prices; cyclicality of the metals industry and the industries that purchase our products; significant competition; interruption in sources of metals supply; integrating future acquisitions; collective agreements and work stoppages; environmental liabilities; changes in government regulations; failure of key computer-based systems; loss of key individuals; and the current economic climate. While we believe that the expectations reflected in the forward-looking statements contained herein are reasonable, no assurance can be given that these expectations will prove to be correct, and such forward-looking statements included herein should not be unduly relied upon. These statements speak only as of the date hereof. Except as required by law, we do not assume any obligation to update the aforementioned forward-looking statements. Our actual results could differ materially from those anticipated in the aforementioned forward-looking statements, as applicable, including as a result of the risk factors set forth elsewhere herein and in our filings with the securities regulatory authorities which are available on SEDAR at www.sedar.com.

NON-GAAP MEASURES

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes a number of measures that are not prescribed by GAAP and as such may not be comparable to similar measures presented by other companies. We believe these measures are commonly employed to measure performance in our industry and are used by analysts, investors, lenders and other interested parties to evaluate financial performance and our ability to incur and service debt to support our business activities. The measures we use are specifically defined where they are first used in this report.

While we believe that non-GAAP measures are helpful supplemental information, they should not be considered in isolation as an alternative to net income, cash flows generated by operating, investing or financing activities, or other financial statement data presented in accordance with GAAP.

OVERVIEW

We are one of the largest metals distribution companies in North America. We conduct business primarily in three metals distribution segments: metals service centers; energy products; and steel distributors.

Our basic earnings per share were \$0.31 for the quarter ended September 30, 2013 compared to \$0.37 for the same quarter of 2012. Earnings were negatively impacted by lower selling prices at our metals service centers and our steel distributors segments, inventory reserves of \$6 million in our energy products segment and an asset impairment charge of \$5 million at our Thunder Bay Terminal operation. We have seen a decline in activity across North America which started in late 2012. Our energy products revenues and operating profits increased due to the acquisition of Apex Distribution in November 2012.

We recorded other finance income of \$4 million related to a fair value adjustment reducing the Apex contingent consideration liability.

For the nine months ended September 30, 2013, our basic earnings per share were \$1.00 compared to \$1.29 for the same period in 2012.

During September 2013, we completed two small acquisitions for an aggregate purchase price of \$11 million, increasing our number of Apex Distribution locations by four.

RESULTS OF OPERATIONS

The following table provides revenues, operating profits before interest, other finance income or expense, asset impairment and income taxes. The corporate expenses included are not allocated to specific operating segments. Gross margins (revenue minus cost of sales) as a percentage of revenues and operating profits as a percentage of revenues are also shown. The table shows the segments as they are reported to management and are consistent with the segment reporting in the condensed consolidated financial statements.

METALS SERVICE CENTERS

a) Description of operations

We provide processing and distribution services to a broad base of approximately 39,000 end users through a network of 54 Canadian locations and 12 U.S. locations. Our metals service centers carry a broad line of products in a wide range of sizes, shapes and specifications, including carbon hot rolled and cold finished steel, pipe and tubular products, stainless steel and aluminum. We purchase these products primarily from steel producers in North America and process and package them in accordance with end user specifications. We service all major geographic regions of Canada and the Southeastern and Midwestern regions in the United States. Within Canada, our service centers operate under the names Russel Metals, Métaux Russel, A.J. Forsyth, Acier Leroux, Acier Loubier, Acier Richler, Alberta Industrial Metals, B&T Steel, Leroux Steel, Mégantic Métal, Russel Metals Specialty Products, Métaux Russel Produits Spécialisés, McCabe Steel, Siemens Laserworks and York-Ennis. Our U.S. service centers operate under the names Russel Metals Williams Bahcall, JMS Russel Metals, Norton Metals and Baldwin International.

b) Factors affecting results

The following is a general discussion of the significant factors affecting our metals service centers results. More specific information on how these factors impacted the third quarter of 2013 and 2012 is found in the sections that follow.

Steel prices fluctuate significantly throughout the steel cycle. Steel prices are influenced by overall demand, trade sanctions, iron ore prices, scrap steel prices and product availability. Steel prices declined slightly during the first half of 2013 and stabilized in the third quarter of 2013. Supply side management, practiced by steel producers in North America, and international supply and demand, which impacts steel imports, affects product availability. Trade sanctions are initiated either by steel mills or by government agencies in North America.

Demand for our product is significantly affected by economic cycles. Revenues and operating profits fluctuate with the level of general business activity in the markets served. We are most impacted by the manufacturing, resource and construction segments of the Canadian economy.

Canadian service centers, which represent the majority of our metals service center operations, have operations in all regions of Canada and are affected by specific regional economic conditions. Our large market share and diverse customer base of approximately 22,000 customers means that our results tend to mirror the performance of the regional economies of Canada. Our U.S. operations, which have approximately 17,000 customers, are impacted by the local economic conditions in the regions that they serve.

The decline of the Canadian dollar in the third quarter of 2013 versus the same period in 2012 resulted in a less than 1% increase in revenues and profits for our U.S. operations translated to Canadian dollars. Revenues and profits of our U.S. operations reported for the nine months ended September 30, 2013 were converted at \$1.0236 per US\$1 compared to \$1.0021 per US\$1 for the same period of 2012. The exchange rate at September 30, 2013 used to translate the balance sheet was \$1.0285 per US\$1 versus \$0.9949 per US\$1 at December 31, 2012.

Our Canadian operations are affected by the U.S. dollar exchange rate since some products are sourced outside of Canada and are priced in U.S. dollars. Movement in the Canadian dollar has a short-term impact on inventory prices.

c) Metals service centers segment results -- Three Months Ended September 30, 2013 Compared to September 30, 2012

Revenues for the three months ended September 30, 2013 decreased 4% to \$367 million compared to the same period in 2012. The average selling price of metal for the three months ended September 30, 2013 was approximately 7% lower than the average selling price for the three months ended September 30, 2012. The lower average selling price was a result of the general economic slowdown which started in 2012 and lower metal prices. Tons shipped in the metals service centers segment in the third quarter of 2013 were approximately 6% higher than the third quarter of 2012. Tons shipped in our U.S. metals service centers increased over the same quarter last year by 14% and by 3% in our Canadian metals service centers. The increase in tons shipped was more pronounced in Western Canada and our U.S. service centers. The Metals Service Center Institute reported an increase in tons shipped for the industry of 5% in the U.S. for the 2013 third quarter; however, for Canada they reported a decrease of 3%.

Gross margin dollars for the third quarter of 2013 were \$1 million lower than the third quarter of 2012 due to lower selling prices. Gross margin as a percentage of revenues at 20.7% is an improvement compared to 20.4% for the second quarter of 2013 due to stabilizing metal prices.

Operating expenses in the third quarter of 2013 were higher by \$2 million than in the third quarter of 2012, mainly related to the effect of the decline in the Canadian dollar on the conversion of our U.S. operations.

Metals service centers operating profit for the three months ended September 30, 2013 of \$20 million compares to \$23 million for the same period in 2012 and reflects lower gross margin dollars and higher operating expenses.

d) Metals service centers segment results -- Nine Months Ended September 30, 2013 Compared to September 30, 2012

Revenues for the nine months ended September 30, 2013 were \$1.1 billion compared to \$1.2 billion for the same period in 2012. Tons shipped in the metals service centers segment in the nine months ended September 30, 2013 were approximately 3% lower than the same period of 2012. Our first half of 2013 reported a year over year decline in tons of 7%. Higher demand in the third quarter resulted in a year to date demand decline of 3%. The average selling price of metal for the nine months ended September 30, 2013 was approximately 8% lower than the average selling price for the nine months ended September 30, 2012.

Gross margin as a percentage of revenues was 20.6% for the nine months ended September 30, 2013 and 2012.

Operating expenses for the nine months ended September 30, 2013 decreased \$1 million compared to the same period in 2012, mainly related to lower variable compensation offset by the impact of the decline in the Canadian dollar on the conversion of our U.S. operations.

Metals service centers operating profit for the nine months ended September 30, 2013 decreased to \$58 million compared to \$85 million for the same period in 2012 a result of lower steel pricing in the first nine months of 2013 and lower volumes during the first half of 2013 compared to 2012.

ENERGY PRODUCTS

a) Description of operations

These operations distribute oil country tubular goods (OCTG), line pipe, tubes, valves and fittings, primarily to the energy industry in Western Canada and the United States. A significant portion of our business units are clustered in Alberta in Canada and Colorado and Texas in the U.S. A large portion of our pipe inventories are located in third party yards ready for distribution to customers throughout North America. In addition, we operate from 57 Canadian and 19 U.S. facilities mainly to support our valve and fitting operations. The majority of these facilities are oil field stores to support the Apex Distribution network. We purchase our products from the pipe division of North American steel mills, independent manufacturers of pipe, valve and fittings, international steel mills or other distributors. Our energy products segment operates under the names Apex Distribution, Apex Remington, Comco Pipe and Supply Company, Fedmet Tubulars, Triumph Tubular & Supply, Pioneer Pipe and Spartan Energy Tubulars.

b) Factors affecting results

The following is a general discussion of the factors affecting our energy products segment operations. More specific information on how these factors impacted the third quarter of 2013 and 2012 is found in the sections that follow.

The price of natural gas and oil can impact rig count and drilling activities, particularly in Western Canada. Rig activity affects demand for our products. The price of oil softened in 2013 resulting in lower 2013 rig activity for the first nine months of 2013. Activity in Western Canada is dependent on Canadian oil prices which had been below U.S. oil prices during 2013 due to a shortage of pipeline capacity. Natural gas prices, while up marginally from year end, are at low levels and consequently drilling activity related to natural gas remained below historical levels. Fracking technology, applied to horizontal drilling, enables producers to economically drill in the oil and gas-rich shale fields and remains the focus of our OCTG sales efforts. During 2012 and early 2013, the sale of large diameter pipe for use in distribution feeder lines had been an active area for our U.S. operations as new shale fields were developed and their output connected to the existing pipelines.

Prices for pipe products are influenced by overall demand, trade sanctions and product availability. Trade sanctions are initiated either by steel mills or by government agencies in North America. Both the Canadian and U.S. governments have imposed duties on certain Chinese pipe, which remain in effect and reduce imports of these products. The U.S. government has also initiated a review of pipe from India, Korea and a number of other countries. Pricing of valves and fittings are not as sensitive to steel price fluctuations.

Our Canadian operations can be affected by the U.S. dollar exchange rate since some products are sourced outside of Canada and are priced in U.S. dollars. Movement in the Canadian dollar impacts the cost of inventory and cost of sales.

Drilling related to oil and natural gas in Western Canada historically has peaked during the period from October to March.

c) Energy products segment results -- Three Months Ended September 30, 2013 Compared to September 30, 2012

Energy products segment revenues increased 42% to \$353 million for the third quarter of 2013 compared to the same period in 2012 primarily due to the Apex Distribution acquisition. Revenues in our energy products segment on a same store basis were 10% higher than the same period last year. Increased revenue from our Canadian operations servicing oil drilling activity offset by lower volumes at our U.S. line pipe distribution operation accounted for this difference.

Gross margin as a percentage of revenues for the three months ended September 30, 2013 was 15.0% compared to 13.4% for the same period in 2012 due to higher margins at the Apex Distribution operations offset by lower margins due to inventory reserves of \$6 million taken on slow moving line pipe and OCTG. Margins on a same store basis and excluding inventory reserves were 13% for the 2013 third quarter.

Operating expenses as a percentage of revenues were 10% versus 7% in the third quarter of 2012 due to the higher expense structure at Apex Distribution. On a same store basis operating expenses were 7%, consistent with last year.

This segment generated an operating profit of \$16 million for the three months ended September 30, 2013 and 2012. Operating profits were up due to the contribution of Apex Distribution offset by line pipe and OCTG inventory reserves.

d) Energy products segment results -- Nine Months Ended September 30, 2013 Compared to September 30, 2012

Energy products segment revenues increased 48% to \$1.1 billion for the nine months ended September 30, 2013 compared to the same period in 2012 primarily due to the Apex Distribution acquisition. On a same store basis revenues are higher by 1% related to increases at our Canadian operation servicing the oil sands and our operations servicing the oil drilling activity in Canada offset by decreases at our U.S. line pipe operation.

Gross margin as a percentage of revenues for the nine months ended September 30, 2013 was 15.4% compared to 13.6% for the same period in 2012 due to higher margins at the Apex Distribution operations.

Operating expenses on a same store basis were 7% of revenues consistent with 2012. Apex Distribution has a higher operating expense component so the percentage reported increased to 10%.

Operating profit was \$58 million for the nine months ended September 30, 2013 compared to \$45 million for the same period in 2012, mainly related to Apex Distribution offset by lower earnings at our same store operations.

STEEL DISTRIBUTORS

a) Description of operations

Our steel distributors act as master distributors selling steel in large volumes to other steel service centers and equipment manufacturers mainly on an "as is" basis. Our U.S. operation has a cut-to-length facility in Houston, Texas where it processes coil for its customers. Our steel distributors source their steel both domestically and off shore.

The main steel products sourced by this segment are structural beam, plate, coils, pipe and tubing; however, product volumes vary based on the economy and trade actions in North America. Our steel distributors operate under the names Wirth Steel and Sunbelt Group. Arrow Steel, a division of Sunbelt Group, processes coils.

b) Factors affecting results

The following is a general discussion of the factors affecting our steel distributors. More specific information on how these factors impacted the third guarter of 2013 and 2012 is found in the sections that follow.

Steel prices are influenced by overall demand, trade sanctions and product availability both domestically and worldwide. Trade sanctions are initiated either by steel mills or government agencies in North America. Trade actions currently exist on plate and pipe from specified countries. Steel imports are affected both by mill capacity by product line in North America, as well as international supply and demand. In addition, these factors significantly affect product availability in North America. Current lead times for deliveries from North American mills are short due to excess capacity, reducing demand for imports.

Demand for steel that is sourced off shore fluctuates significantly and is mainly driven by price and product availability in North America. Our steel distributors have a significant number of customers who buy product from them on a periodic basis, which can result in large fluctuations in revenues reported from period to period.

Our Canadian operations source product outside of Canada that is priced in U.S. dollars. Movements in the Canadian dollar can result in some products that we have purchased being subsequently available in the marketplace at a lower cost.

c) Steel distributors segment results -- Three Months Ended September 30, 2013 Compared to September 30, 2012

Steel distributors revenues decreased 6% to \$74 million for the three months ended September 30, 2013 compared to the three months ended September 30, 2012 due to short lead times and availability from North American mills coupled with lower demand and cautious inventory stocking positions in the service centers and equipment manufacturers.

Gross margin as a percentage of revenues was 11.9% for the three months ended September 30, 2013 compared to 13.0% for the three months ended September 30, 2012. The decline related to compressed margins due to weaker demand for steel.

Operating expenses for the third quarter of 2013 were consistent with the third quarter of 2012.

Operating profit for the three months ended September 30, 2013 was \$5 million, compared to \$6 million for the three months ended September 30, 2012 reflecting lower demand and gross margins in the current quarter compared to the 2012 third quarter.

d) Steel distributors segment results -- Nine Months Ended September 30, 2013 Compared to September 30, 2012

Revenues for the nine months ended September 30, 2013 decreased 21% to \$213 million compared to the nine months ended September 30, 2012 due to lower demand in both Canada and the U.S.

Gross margin as a percentage of revenues decreased to 12.5% for the nine months ended September 30, 2013 compared to 14.2% for the same period in 2012. The decline related to weaker demand and lower prices in 2013.

Operating expenses declined \$3 million for the nine months ended September 30, 2013 compared with the same period in 2012, mainly related to lower variable compensation.

Operating profit for the nine months ended September 30, 2013 was \$15 million, compared to \$24 million for the nine months ended September 30, 2012, mainly due to lower demand.

Corporate Expenses -- Three and Nine Months Ended September 30, 2013 Compared to September 30, 2012

Corporate expenses were \$5 million for the three months ended September 30, 2013 and 2012. For the nine months ended September 30, 2013 corporate expenses of \$12 million were lower than the \$17 million for the nine months ended September 30, 2012. Corporate expenses for 2013 were lower mainly due to lower variable compensation related to lower earnings.

Consolidated Results -- Three and Nine Months Ended September 30, 2013 Compared to September 30, 2012

Operating profits before asset impairment were \$37 million for the three months ended September 30, 2013 compared to \$40 million for the three months ended September 30, 2012. During the 2013 third quarter, we concluded that the long-lived assets of our Thunder Bay Terminal operation were impaired as discussed below.

Operating profits before asset impairment for the nine months ended September 30, 2013 were \$118 million compared to \$139 million for the same period in 2012, mainly due to the lower volumes in the first half of 2013.

ASSET IMPAIRMENT

Our revenues and operating profits described as other in our reporting includes the operations of a bulk handling terminal in Thunder Bay, Ontario. This operation transfers coal, potash and other bulk products from rail to ship for movement on the Great Lakes. During 2013, volumes handled continued to deteriorate and expenses increased due to increased property taxes that we are currently challenging, resulting in operating losses. These changes were key indicators that led us to review the carrying value of these long-lived assets for impairment which resulted in a write-down of \$5 million in the terminal's property, plant and equipment.

INTEREST EXPENSE AND INCOME

Net interest expense was unchanged at \$9 million for the three months ended September 30, 2013 and 2012. Net interest expense was \$27 million for the nine months ended September 30, 2013 compared to \$24 million for the same period in 2012, reflecting the higher debt outstanding after the issuance of the Canadian Senior Notes in April 2012.

OTHER FINANCE EXPENSE

Other finance income was \$3 million for the three months ended September 30, 2013. We recorded income from a change in fair value of \$3 million associated with the expected contingent consideration related to the Apex Distribution acquisition. For the nine months ended September 30, 2013, other finance expense was \$0.3 million related to the change in fair value of and imputed interest on the contingent consideration. For the nine months ended September 30, 2012, the \$5 million expense related to costs associated with our redemption of debt in May 2012.

INCOME TAXES

We recorded a provision for income taxes of \$6 million for the third quarter of 2013 compared to \$9 million in the third quarter of 2012. Our effective income tax rate for the three months ended September 30, 2013 was 25% and for the nine months ended September 30, 2013 was 30%. The effective income tax rate for the third quarter of 2013 was lower due to the change in fair value of the contingent consideration related to the Apex Distribution acquisition which was not tax effected. We estimate our normalized effective income tax rate, excluding the finance expense, to be 28.5% for 2013.

NET EARNINGS

Net earnings for the third quarter of 2013 were \$19 million compared to \$22 million in the third quarter of 2012. Basic earnings per share for the third quarter of 2013 were \$0.31 per share compared to \$0.37 per share for the third quarter of 2012. Basic earnings per share for the nine months ended September 30, 2013 were \$1.00 per share compared to \$1.29 for the same period last year.

SHARES OUTSTANDING AND DIVIDENDS

The weighted average number of common shares outstanding for the third quarter of 2013 was 60,872,628 compared to 60,139,308 for the third quarter of 2012. The weighted average number of common shares outstanding for the nine months ended September 30, 2013 was 60,737,101 compared to 60,110,769 for the nine months ended September 30, 2012. The number of common shares outstanding increased as a result of the exercise of options. As at September 30, 2013 and November 7, 2013, we had 60,890,252 common shares outstanding.

We paid common share dividends of \$21 million or \$0.35 per share in the third quarter of 2013 and 2012.

We have \$175 million of 7.75% Convertible Unsecured Subordinated Debentures outstanding which mature on September 30, 2016. Each debenture is convertible into common shares at the option of the holder at any time on or prior to the business day immediately preceding (i) the maturity date, or (ii) the date specified for redemption of the Convertible Debentures, at a conversion price of \$25.75 per share being a conversion rate of 38.8350 common shares per \$1,000 principal amount of Convertible Debentures.

We have \$300 million of 6.0% Senior Notes due April 19, 2022. The indenture for our Senior Notes has restrictions related to the payment of quarterly dividends in excess of \$0.35 per share. We currently have a basket of approximately \$157 million available for restricted payments, which is adjusted for 50% of our net earnings or losses on a quarterly basis. This basket would be available for increased dividend payments.

Under our syndicated bank facility, the payment of dividends is subject to excess borrowing base availability of not less than four times the declared dividend. We do not believe this requirement will restrict our ability to pay a dividend as our borrowing base, which is based on percentages of accounts receivable and inventories, has traditionally been in excess of borrowings plus four times the current dividend.

EBITDAThe following table shows the reconciliation of net earnings to adjusted EBIT and adjusted EBITDA:

				Ended ber 30	Nine Months Ended September 30				
(millions)		2013	•	2012		2013	•	2012	
Net earnings for the period	\$	18.9	\$	22.4	\$	60.5	\$	77.8	
Provision for income taxes		6.4		9.3		25.5		32.8	
Interest and finance expense, net		6.0		8.5		27.0		28.4	
Asset impairment charges		5.2		-		5.2		-	
Adjusted earnings before interest, finance and income taxes		36.5		40.2		118.2		139.0	
Depreciation and amortization		8.8		6.3		25.2		18.1	
Adjusted earnings before interest, finance, income taxes,					_				
depreciation and amortization	\$	45.3	\$	46.5	\$	143.4	\$	157.1	

We believe that adjusted EBITDA, a non-GAAP measure, may be useful in assessing our operating performance and as an indicator of our ability to service or incur indebtedness, make capital expenditures and finance working capital requirements. The items excluded in determining adjusted EBITDA are significant in assessing our operating results and liquidity. Therefore, adjusted EBITDA should not be considered in isolation or as an alternative to cash from operating activities or other combined income or cash flow data prepared in accordance with GAAP.

CAPITAL EXPENDITURES

Capital expenditures were \$20 million for the nine months ended September 30, 2013 compared to \$26 million in the same period of 2012. Depreciation expense was \$21 million for the nine months ended September 30, 2013 compared to \$17 million in the same period in 2012. The increase in depreciation expense relates to acquisitions made in 2012. Our expectation is for capital expenditures to approximate depreciation expense over the long term.

LIQUIDITY

At September 30, 2013, we had cash of \$139 million compared to \$115 million at December 31, 2012. As at September 30, 2013 and December 31, 2012, we had bank indebtedness of \$14 million. Net cash increased \$24 million in the nine months ended September 30, 2013.

In the nine months ended September 30, 2013, we generated cash of \$92 million from operations and \$7 million from reduced working capital. We utilized \$20 million investing in capital expenditures, utilized \$11 million to complete two small energy products segment acquisitions and returned \$64 million to shareholders through dividends to shareholders.

Our metals distribution business experiences significant swings in working capital which impact cash flow. Inventory and accounts receivable represent a large percentage of our total assets employed and vary throughout each cycle. Accounts receivable and inventory comprise our largest liquidity risks. Our customers are impacted by the economic climate and thus it is possible to experience additional bad debts and increased days outstanding for accounts receivable, which may affect the timing of collections. Total assets were \$1.8 billion at September 30, 2013 and December 31, 2012. At September 30, 2013 and December 31, 2012, current assets excluding cash represented 73% and 74% respectively of our total assets excluding cash.

Inventory generated \$42 million in cash in the nine months ended September 30, 2013. Inventories represented 41% of our total assets at September 30, 2013 and 43% at December 31, 2012.

Inventory by Segment	Sept. 30	June 30	Mar. 31	Dec. 31	Sept. 30
	2013	2013	2013	2012	2012
Metals service centers Energy products Steel distributors	\$ 247	\$ 255	\$ 268	\$ 274	\$ 286
	420	427	420	411	350
	67	88	84	79	87
Total operations	\$ 734	\$ 770	\$ 772	\$ 764	\$ 723

			Quarters Ended								
Inventory Turns by Segment	Sept. 30	June 30	Mar. 31	Dec. 31	Sept. 30						
	2013	2013	2013	2012	2012						
Metals service centers Energy products Steel distributors	4.7	4.7	4.2	3.9	4.3						
	2.9	2.5	3.1	3.4	2.5						
	3.9	2.6	3.1	3.6	3.1						
Total operations	3.6	3.2	3.5	3.6	3.3						

At September 30, 2013, our metals service centers had slightly lower inventory tons priced at lower values compared to December 31, 2012. This segment has reduced inventory levels in conjunction with the decline in demand.

Our energy products operations had inventory at the end of the third quarter of 2013 which was 2% higher than December 31, 2012. Turns have improved with increased revenues compared to the second quarter of 2013.

Our steel distributors segment had lower inventory levels compared to December 31, 2012 resulting in improved turns.

Accounts receivable generated cash of \$2 million for the nine months ended September 30, 2013 and represented 26% of our total assets at September 30, 2013 compared to 25% of our total assets at December 31, 2012.

During the nine months ended September 30, 2013, we made income tax payments of \$30 million which are lower than payments of \$54 million for the nine months ended September 30, 2012 as a result of lower earnings.

The balances disclosed in our condensed consolidated cash flow statements are adjusted to remove the noncash component related to foreign exchange rate fluctuations impacting inventory, accounts receivable, accounts payable and income tax balances of our U.S. operations.

FREE CASH FLOW

	Quarters Ended September 30					Nine Months Ended September 30			
(millions)		2013	-	2012		2013	-	2012	
Cash from operating activities before non-cash working capital Purchase of property, plant and equipment	\$	\$ 28.6 (5.6)		30.4 (5.7)	\$ 92.4 (19.6)		\$	105.3 (26.4)	
	\$	23.0	\$	24.7	\$	72.8	\$	78.9	

We believe that free cash flow may be useful in assessing our ability to pay dividends, reduce outstanding debt and fund working capital growth. Free cash flow is a non-GAAP measure regularly used by investors and analysts to evaluate companies.

CASH, DEBT AND CREDIT FACILITIES

Debt

(millions)	Sept. 30,	2013	Dec. 31,	2012
Long-Term Debt 6.0% \$300 million Senior Notes due April 19, 2022 7.75% \$175 million Convertible Debentures due September 30, 2016 Finance lease obligations, maturing 2014 to 2017	\$	294 160 3	\$	293 158 5
Current portion		457 (1)		456 (2)
	\$	456	\$	454

Our Convertible Debentures have been split between debt and equity. The amount allocated to equity represented the valuation of the holders' option to convert the Convertible Debentures into common shares. The fair value adjustments on the cash conversion feature were treated as a derivative prior to the amendment of the Trust Indenture in December 2010. The debt allocated to equity is accreted as a charge through interest expense over the life of the debentures.

Cash and Bank Credit Facilities

As at September 30, 2013 (millions)	Russel M Fa	letals acility	U.S. Subsi Fa	diary acility	Total
Bank loans Cash net of outstanding cheques	\$	(21) 136	\$	- 10	\$ (21) 146
Net cash Letters of credit		115 (34)		10 (6)	125 (40)
	\$	81	\$	4	\$ 85
Facilities Borrowings and letters of credit Letters of credit	\$	275 50	\$	21 -	\$ 296 50
Facilities availability	\$	325	\$	21	\$ 346
Available line based on borrowing base	\$	325	\$	21	\$ 346

We have a credit facility with a syndicate of Canadian and U.S. banks totaling \$325 million which was amended and extended to June 24, 2017 during the third quarter of 2013. The new syndicated facility consists of availability of \$275 million under Tranche I to be utilized for borrowings and letters of credit and \$50 million under Tranche II to be utilized only for letters of credit. Letters of credit are issued under Tranche II first and additional needs are issued under Tranche I. The borrowings and letters of credit are available on a revolving basis, up to an amount equal to the sum of specified percentages of our eligible accounts receivable and inventories, to a maximum of \$325 million. As of September 30, 2013, we were entitled to borrow and issue letters of credit totaling \$325 million under this facility. At September 30, 2013 and December 31, 2012, we had borrowings of \$21 million and \$37 million respectively under this facility. At September 30, 2013, we had letters of credit of \$34 million compared to \$37 million at December 31, 2012.

In July 2013, we renewed our U.S. subsidiary facility with an expiry of July 2014. The maximum borrowings, including letters of credit, under the U.S. subsidiary's new facility are US\$20 million. At September 30, 2013, this subsidiary had no borrowings and had letters of credit of US\$6 million. At December 31, 2012, this subsidiary had no borrowings and had letters of credit of US\$21 million.

With our cash, cash equivalents and our bank facilities we have access to approximately \$415 million of cash based on our September 30, 2013 balances. The use of our bank facilities has been predominantly to fund working capital requirements, acquisitions and trade letters of credit for inventory purchases. These lines may be used to support increased working capital needs when volumes and steel prices increase.

CONTRACTUAL OBLIGATIONS

As at September 30, 2013, we were contractually obligated to make payments as per the following table:

Contractual Obligations		Payments due in									
(millions)	2013	2013		2014 2016 2018 and and 2015 and 2017 thereafte			Tota	al			
Accounts payable	\$	365.3	\$	-	\$	-	\$	-	\$	365.3	
Bank loans		20.6		-		-		-		20.6	
Debt		-		-		174.9		300.0		474.9	
Long-term debt interest		9.0		63.2		49.6		81.9		203.7	
Finance lease obligations		0.6		2.2		0.8		-		3.6	
Operating leases		4.9		30.6		19.4		26.8		81.7	
Total	\$	400.4	\$	96.0	\$	244.7	\$	408.7	\$	1,149.8	

As part of the purchase consideration for Apex Distribution we agreed to pay additional consideration during the next five years based on earnings before interest and taxes and return on net assets. The fair value of this consideration was \$43 million at September 30, 2013. The obligation was increased by \$1 million in 2013 related to the change in fair value. The change in fair value is comprised of a reduction of the expected payout of \$4 million offset by an increase due to imputed interest of \$5 million. This amount will be reviewed quarterly and adjusted through income for increases or decreases in the liability.

We have obligations related to multiple defined benefit pension plans in Canada, as disclosed in Note 14 of our 2012 consolidated financial statements. During the third quarter of 2013 we contributed \$1 million to these plans. We expect to contribute approximately \$2 million during the remainder of the year although we are currently preparing valuations on several of our plans which may result in an increase in our 2013 payment. The defined benefit obligations reported in the financial statements use different assumptions than the going concern actuarial valuations prepared for funding. In addition, the actuarial valuations provide a solvency valuation, which is a valuation assuming the plan is wound up at the valuation date. Our funding obligations reported would increase by \$6 million on a solvency basis and thus additional funding could be required based on solvency if the plans were wound up. We estimate the impact of a change in the discount rate on the solvency obligation would be similar to that disclosed in Note 14.

We have disclosed our obligations related to environmental litigation, regulatory actions and remediation in our Annual Information Form. These obligations relate to previously divested or discontinued operations and do not relate to the metals distribution business. During the second quarter of 2013, an agreement was reached with the purchasers of one of these businesses whereby \$2 million was paid into escrow to fund remediation activities in return for an indemnification for any remediation expense beyond that amount. The escrow funds were fully depleted during the 2013 third quarter.

OFF-BALANCE SHEET ARRANGEMENTS

Our off-balance sheet arrangements consist of the letters of credit disclosed in the bank credit facilities table and operating lease obligations disclosed in the contractual obligations table.

ACCOUNTING ESTIMATES

The preparation of our financial statements requires management to make estimates and judgements that affect the reported amounts. On an ongoing basis, we evaluate our estimates, including those related to bad debts, inventory net realizable value and obsolescence, useful lives of fixed assets, asset impairment, fair values, income taxes, pensions and benefits obligations, guarantees, decommissioning liabilities, contingencies, contingent consideration, litigation and assigned values on net assets acquired. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Our most significant assets are accounts receivable and inventories.

Accounts Receivable

An allowance for doubtful accounts is maintained for estimated losses resulting from the inability of our customers to make required payments. Assessments are based on aging of receivables, legal issues (bankruptcy status), past collection experience, current financials or credit agency reports and the experience of our credit personnel. Accounts receivable which we determine to be uncollectible are reserved in the period in which the determination is made. If the financial condition of our customers was to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. Our reserve for bad debts at September 30, 2013 approximates our reserve at December 31, 2012. Bad debt expense for the third quarter of 2013 as a percentage of revenue approximates that of 2012.

Inventories

We review our inventories to ensure that the cost of inventories is not in excess of its estimated net realizable value and for obsolete and slow moving product. Inventory reserves or write-downs are recorded when cost exceeds the estimated selling price less cost to sell and when product is determined to be slow moving or obsolete. Our inventory reserve level at September 30, 2013 was \$6 million higher than the level at December 31, 2012.

Other areas involving significant estimates and judgements include:

Income Taxes

We believe that we have adequately provided for income taxes based on all of the information that is currently available. The calculation of income taxes in many cases requires significant judgement in interpreting tax rules and regulations, which are constantly changing. Our tax filings are also subject to audits, which could materially change the amount of current and future income tax assets and liabilities. Any change would be recorded as a charge or reduction in income tax expense.

Business Combinations

We review the fair value of assets acquired for acquisitions. Where we deem it appropriate we hire outside business valuators to assist in the assessment of the fair value of property, plant, equipment and intangibles of acquired businesses. The assessment of fair values requires significant judgement including the contingent consideration which is fair valued quarterly.

Employee Benefit Plans

Our actuaries perform a valuation, at least every three years, for each defined benefit plan to determine the actuarial present value of the benefits. The valuation uses management's assumptions for the interest rate, rate of compensation increase, rate of increase in government benefits and expected average remaining years of service of employees. While we believe that these assumptions are reasonable, differences in actual results or changes in assumptions could materially affect employee benefit obligations and future net benefit plan costs. We account for differences between actual and assumed results by recognizing differences in benefit obligations and plan performance immediately in other comprehensive income.

We had approximately \$87 million in plan assets at September 30, 2013, which is \$1 million more than the December 31, 2012 plan assets. The interest rate at September 30, 2013 was 4.5% which is 0.5% higher than the interest rate at December 31, 2012 but unchanged from the 2013 second quarter. This increased interest rate resulted in a reduction of the obligation of \$8 million for the nine months ended September 30, 2013.

CONTROLS AND PROCEDURES

Disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is gathered and reported to senior management on a timely basis so that appropriate decisions can be made regarding public disclosure.

The purpose of internal controls over financial reporting as defined by the Canadian Securities Administrators is to provide reasonable assurance that:

- (i) financial statements prepared for external purposes are in accordance with the Company's generally accepted accounting principles,
- (ii) transactions are recorded as necessary to permit the preparation of financial statements, and records are maintained in reasonable detail.
- (iii) receipts and expenditures of the Company are made only in accordance with authorizations of the Company's management and directors, and
- (iv) unauthorized acquisitions, uses or dispositions of the Company's assets that could have a material effect on the financial statements will be prevented or detected in order to prevent material error in financial statements.

The President and Chief Executive Officer and the Executive Vice President and Chief Financial Officer have caused management and other employees to design and document our disclosure controls and procedures and our internal controls over financial reporting. The design and evaluation of internal controls was completed using the framework and criteria established in "Internal Control – Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In accordance with National Instrument 52-109 we have limited our scope for reporting on disclosure controls and procedures and internal controls over financial reporting during the first year of acquiring Apex Distribution.

Apex Distribution was a private company prior to our acquisition on November 8, 2012 and does not have documented internal controls and lacks appropriate controls in its computer system to ensure all transactions are recorded in accordance with generally accepted accounting principles. We are working with Apex Distribution's management to add appropriate manual and computer controls and to document the internal control processes.

No changes were made in our disclosure controls or our internal controls over financial reporting at the non-Apex Distribution operations during the third quarter of 2013 that materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Summary Financial Information - Apex Distribution

For the nine months ended September 30, 2013 (millions)

Revenue Earnings before interest and taxes	\$ 332 26
As at September 30, 2013 (millions)	
Current assets	\$ 175
Current liabilities excluding contingent consideration	(62)
Goodwill and intangibles	143
Other non-current assets	17
Deferred income tax liability	(17)
Contingent consideration	43
Other non-current liabilities	(1)

The line items that could be affected by this lack of appropriate controls at Apex Distribution operations are revenue, earnings before interest and taxes, current assets and current liabilities excluding contingent consideration.

VISION AND STRATEGY

The metals distribution business is a segment of a mature, cyclical industry. The use of service centers by both manufacturers and end users of steel continues to grow. This is evidenced by the growth in the percentage of total steel shipments from steel producers to service centers in the last five years. As the distribution segment's share of steel industry shipments continues to grow, service centers such as ours can grow their business over the course of a cycle.

We strive to deal with the cyclical nature of the business by operating with the lowest possible net assets throughout the course of a cycle. This intensive asset management reduces borrowings and therefore interest expense in declining periods in the economic cycle. This in turn creates higher, more stable returns on net assets over the course of the cycle. Our conservative management approach creates relatively stronger trough earnings but could cause potential peak earnings to be somewhat muted. Management believes that this strategy will result in higher profits throughout a cycle and we will have average earnings over the full range of the cycle in the top deciles of the industry.

Growth from selective acquisitions is also part of our strategy. We focus on investment opportunities in metals businesses that have strong market niches or provide mass to our existing operations. New acquisitions could be either major stand-alone operations or ones that complement our existing operations. We continue to review opportunities for acquisitions.

We believe that the steel-based pricing cycle will continue to be short and volatile, and a management structure and philosophy that allows the fastest reaction to changes that affect the industry will be the most successful. We will continue to invest in our business systems to enable faster reaction times to changing business conditions. In addition, management believes the high level of service and flexibility provided by service centers will enable this distribution channel to capture an increasing percentage of total metal revenues to end users, allowing for increased growth within the sector.

RISK

The timing and extent of future price changes from steel producers and their impact on us cannot be predicted with any certainty due to the inherent cyclical nature of the steel industry. Demand for our products is returning to pre-2009 levels in all metals service center regions other than Ontario. Demand has increased year over year since 2009 other than in the first nine months of 2013 where it declined by approximately 3% from 2012. We will continue to make structural changes where necessary based on demand levels. Our Apex Distribution acquisition in 2012 increased our exposure to the Western Canadian oil and gas segment. We believe that this continues to be an area of growth; however, our exposure to the cyclicality of oil and gas pricing has increased. Management believes the acquisition of Apex Distribution provides a more stable stream of revenues and earnings for the energy products segment. Our Annual Information Form includes a summary of risks related to our business.

OUTLOOK

We expect to experience stable volumes and pricing in our metals service centers and steel distributor segments for the remainder of 2013. The winter drilling activity should result in increased volumes in our energy products segment. We expect the uncertain economic environment to continue.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying condensed consolidated financial statements and Management's Discussion and Analysis of Financial Condition have been prepared by management and approved by the Audit Committee and the Board of Directors of the Company.

These condensed consolidated financial statements were prepared in accordance with International Financial Reporting Standards, as issued by the International Accounting Standards Board, and, where appropriate, reflect management's best estimates and judgements. Management is responsible for the accuracy, integrity and objectivity of the condensed consolidated financial statements and Management's Discussion and Analysis of Financial Condition within reasonable limits of materiality.

To assist management in the discharge of these responsibilities, the Company has developed, documented and maintained a system of internal controls in order to provide reasonable assurance that its assets are safeguarded; that only valid and authorized transactions are executed; and that accurate, timely and comprehensive financial information is prepared in accordance with International Financial Reporting Standards. In addition, the Company has developed and maintained a system of disclosure controls in order to provide reasonable assurance that the financial information is relevant, reliable and accurate.

The Company's Audit Committee is appointed annually by the Board of Directors. The Audit Committee, which is composed entirely of outside directors, meets with management to satisfy itself that management is properly discharging its financial reporting responsibilities and to review the condensed consolidated financial statements and Management's Discussion and Analysis of Financial Condition. The Audit Committee reports its findings to the Board of Directors for consideration in approving the condensed consolidated financial statements and Management's Discussion and Analysis of Financial Condition for presentation to the shareholders.

The accompanying notes are an integral part of these condensed consolidated financial statements.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) General business description

Russel Metals Inc. (the "Company"), a Canadian corporation, with common shares listed on the Toronto Stock Exchange ("TSX"), is a metals distribution company operating in various locations within North America. The Company's registered office is located at 1900 Minnesota Court, Suite 210, Mississauga, Ontario, L5N 3C9.

These condensed consolidated financial statements were authorized for issue by the Board of Directors on November 7, 2013.

b) Statement of compliance and basis of presentation

These condensed consolidated financial statements, including comparatives, have been prepared using the same accounting policies and methods as those used in the Company's consolidated financial statements for the year ended December 31, 2012, except for the change in accounting policy as explained in Note 2. These condensed consolidated financial statements are in compliance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). Accordingly, certain information and footnote disclosure normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"), have been omitted or condensed. The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements have been set out in Note 2 of the Company's consolidated financial statements for the year ended December 31, 2012. These financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2012.

These condensed consolidated financial statements were prepared on a going concern basis using the historical cost basis except for certain financial instruments. Historical cost is generally based on the fair value of the consideration given in exchange for assets at the time of the transaction.

These condensed consolidated financial statements are presented in Canadian dollars, which is the Company's functional currency.

2. CHANGE IN ACCOUNTING POLICY

The Company adopted *IAS 19 Employee Benefits (amended 2011)* with a date of initial application of January 1, 2012 and changed its basis for determining the income or expense related to its defined benefits plan.

As a result of the change, the Company now determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate previously used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability (asset) at the beginning of the period. It takes into account any changes in the net defined liability (asset) during the period as a result of contributions and benefit payments. The net interest expense (income) on the net defined benefit liability (asset) is comprised of:

- Interest cost on the defined benefit obligation; and
- Interest income on plan assets.

Previously, the Company determined the expected rate of return on plan assets independently based on an expected long-term rate of return.

a) Impact of change in accounting policy

The change in accounting policy has been applied retrospectively. For the year ended December 31, 2012, the defined benefit expense recognized in the statement of earnings had increased and the defined benefit plan re-measurement loss recognized in other comprehensive income had decreased by \$0.9 million, net of income taxes of \$0.3 million. For the quarter ended September 30, 2012, the defined benefit expense recognized in the statement of earnings had increased and the defined benefit plan re-measurement loss recognized in other comprehensive income had decreased by \$0.1 million. For the nine months ended September 30, 2012, the defined benefit expense recognized in the statement of earnings had increased and the defined benefit plan re-measurement loss recognized in other comprehensive income had decreased by \$0.6 million, net of income taxes of \$0.2 million.

The Company closes out actuarial gains and losses recognized in other comprehensive income (loss) into retained earnings at the end of each reporting period. For the year ended December 31, 2012, \$18.1 million was reclassified from accumulated other comprehensive loss to retained earnings.

b) The following table summarizes the financial effects of the implementation of the new accounting policy:

(millions)	nployee openses	Provis Income	sion for Taxes	Accumulate Comprehensi	
December 31, 2012 balance before restatement Effect of adoption of IAS 19 Transfer of net actuarial loss	\$ 215.3 1.2 -	\$	39.3 (0.3)	\$	(30.2) 0.9 18.1
Restated balance as at December 31, 2012	\$ 216.5	\$	39.0	\$	(11.2)
(millions)	nployee (penses	Provis Income	sion for Taxes	Accumulate Comprehensi	
September 30, 2012 balance before restatement Effect of adoption of IAS 19 Transfer of net actuarial loss	\$ 159.7 0.8 -	\$	33.0 (0.2)	\$	(37.4) 0.6 8.9
Restated balance as at September 30, 2012	\$ 160.5	\$	32.8	\$	(27.9)

The change in accounting policy had no impact on net assets as at January 1, 2012, September 30, 2012 and December 31, 2012.

3. BUSINESS ACQUISITIONS

The Company accounts for its acquisitions using the acquisition method whereby the assets acquired and the liabilities assumed are recorded at their estimated fair values with the surplus of the aggregate consideration relative to the fair value for the identifiable net assets recorded as goodwill.

- (a) On September 12, 2013, the Company completed its acquisition of Keystone Oilfield, an oilfield supply company with stores operating in Virden, Moosomin and Wawaota, Manitoba, through a share purchase. These locations are included in the Company's Apex Distribution operations in the energy products segment.
- (b) On September 14, 2013, the Company completed its acquisition of Northern Valve Services, a valve service center with operations in Fort St. John, British Columbia, through a share purchase. This location is included in the Company's Apex Distribution operations in the energy products segment.

The combined preliminary purchase price allocation of the two acquisitions is as follows:

(millions)

Net working capital Property, plant and equipment Deferred income tax liability Intangibles Goodwill	\$ 5.3 1.8 (0.6) 1.8 2.5
Net identifiable assets acquired	\$ 10.8
Consideration: Cash Fair value of contingent consideration	\$ 10.5 0.3
	\$ 10.8

The fair value of accounts receivable acquired was \$2.7 million which was included in net working capital. Any accounts receivable which are not collected result in a reduction of the consideration.

These acquisitions complement the Company's energy products segments and were conducted in order to expand the geographical presence and to penetrate new markets. The amount of goodwill, none of which is deductible for tax purposes, reflects the expected future growth potential due to the strategic location of the operations acquired.

The condensed consolidated statements of earnings of the Company for the nine months ended September 30, 2013, includes the operating results of the acquired businesses, including supplementary revenues of \$0.4 million and transaction costs of \$0.1 million. The available financial information does not allow for the accurate disclosure of proforma revenues and earnings before interest, finance expense and provision for income taxes had the Company concluded these acquisitions at the beginning of the fiscal year.

The allocation described above is preliminary and subject to change following the final settlement of various holdbacks which may impact net working capital.

4. INVENTORIES

Inventories are recorded at the lower of cost and net realizable value. Cost is determined on an average cost basis. The Company recorded an inventory impairment charge of \$6.5 million during the quarter ended September 30, 2013 (2012: \$1.0 million) and \$9.4 million for the nine months ended September 30, 2013 (2012: \$2.2 million). Inventories of \$0.7 billion were expensed in cost of materials for the quarter ended September 30, 2013 (2012: \$0.6 billion) and \$2.0 billion (2012: \$1.8 billion) were expensed for the nine months ended September 30, 2013. The Company did not have any reversals of previous inventory impairment charges during the quarters and nine months ended September 30, 2013 and 2012.

5. PROPERTY, PLANT AND EQUIPMENT

Cost (millions)	and E	Land Buildings	achinery Juipment	asehold ements	Total

Net book value (millions)						
December 31, 2012 September 30, 2013					\$ \$	241.8 236.3

All items of property, plant and equipment are recorded and held at cost.

Land included in land and buildings was \$32.6 million (December 31, 2012: \$32.9 million).

For the quarter ended September 30, 2013, depreciation of \$2.1 million was included in cost of materials (2012: \$2.0 million) and depreciation of \$4.9 million (2012: \$3.9 million) was included in other operating expenses. For the nine months ended September 30, 2013, depreciation of \$5.7 million (2012: \$5.2 million) was included in cost of materials and depreciation of \$14.8 million (2012: \$11.9 million) was included in other operating expenses.

Impairment of Assets

The Company reviews the carrying value of long-lived assets for impairment whenever there are events or changes in circumstances that indicate that the carrying amount may not be recoverable. In the third quarter of 2013, the Company completed an impairment review on the Thunder Bay Terminal operation ("the terminal"). The revenues and financial performance of the terminal had deteriorated due to reduced volumes from their existing customer base and the inability to secure replacement tonnage from alternative customers. The recoverability was measured by comparing the carrying value of the assets to the estimated value in use. The estimated value in use was determined by measuring the pre-tax cash flows expected to be generated from the terminal's assets over their estimated useful life, discounted by a pre-tax discount rate. The pre-tax discount rate of 14.5% was derived from the Company's estimated weighted average cost of capital. The Company determined that the future expected discounted cash flows of this operation were insufficient to recover the carrying value of the long-lived assets, resulting in an asset impairment charge of \$5.2 million.

This asset impairment charge is included in the condensed consolidated statements of earnings and reduced the carrying value of the associated assets on a pro-rated basis.

6. GOODWILL AND INTANGIBLES

(millions)	September 30 2013	December 31 2012
Goodwill Intangibles Trademarks	\$ 114.1 74.3 5.0	\$ 110.7 76.4 5.0

Carrying amount

Ψ · ····	December 31, 2012	\$	76.4
	September 30, 2013	\$	74.3

The carrying value of intangible assets as at September 30, 2013 relates to customer relationships and non-competition agreements arising from the acquisition of JMS Metals Services, Norton Metal Products, Siemens Laserworks, Alberta Industrial Metals, Apex Distribution, Keystone Oilfield and Northern Valve Services. The remaining amortization period for customer relationships is 10 to 17 years and for non-competition agreements is three years.

7. REVOLVING CREDIT FACILITIES

In August 2013, the Company amended its credit agreement with a syndicate of banks which provides a credit facility of \$275.0 million (2012: \$202.5 million) available for borrowings and letters of credit and an additional \$50.0 million (2012: \$50.0 million) for letters of credit. Certain fees were reduced and the term extended to June 24, 2017. The new syndicated facility consists of availability of \$275.0 million under Tranche I to be utilized for borrowings and letters of credit and \$50.0 million under Tranche II to be utilized only for letters of credit. Letters of credit are issued under Tranche II first and additional needs are issued under Tranche I. The borrowings and letters of credit are available on a revolving basis, up to an amount equal to the sum of specified percentages of the Company's eligible accounts receivable and inventories, to a maximum of \$325.0 million. The obligations of the Company under this agreement are secured by a pledge of trade accounts receivable and inventories of a significant portion of the Company's operations.

At September 30, 2013, the Company had borrowings of \$20.6 million (December 2012: \$37.0 million) and letters of credit of \$33.6 million (December 2012: \$36.8 million) under this facility. The Company was in compliance with the financial covenants at September 30, 2013.

In July 2013, the Company extended its U.S. Subsidiary one-year credit facility. The maximum credit under this facility is US\$20 million (2012: US\$30 million). At September 30, 2013 and December 31, 2012 the subsidiary had no borrowings and letters of credit of US\$5.5 million and US\$20.6 million, respectively.

8. LONG-TERM DEBT

(millions)	September 30 2013	December 31 2012
6.0% \$300 million Senior Notes due April 19, 2022 7.75% \$175 million Convertible Debentures due September 30, 2016 Finance lease obligations (Note 18) Less: current portion	\$ 293.8 160.6 3.2 (1.4)	\$ 293.4 157.8 4.6 (2.2)
Total long-term debt	\$ 456.2	\$ 453.6

a) On April 19, 2012, the Company issued through a private placement, \$300 million 6.0% Senior Notes (the "Notes") due April 19, 2022, for total net proceeds of \$293 million. Interest is due on April 19 and October 19 of each year.

The Company may redeem up to 35% of the Notes prior to April 19, 2014 with the net proceeds of certain equity offerings at the redemption price of 106% of their principal amount plus accrued and unpaid interest. Prior to April 19, 2017, the Company may redeem the Notes in whole or in part at an amount which is the greater of (i) the present value of future interest and principal payments based on Canada Yield Price or (ii) 101% of the principal amount plus accrued and unpaid interest. After April 19, 2017, the Company may redeem the Notes in whole or in part at any time at 103% of the principal amount declining rateably to 100% of the principal amount on or after April 19, 2020.

The Notes contain certain restrictions on the payment of common share dividends in excess of \$0.35 per share per quarter. The Notes also contain certain covenants that limit the Company's ability to incur additional indebtedness. The Company was in compliance with these covenants at September 30, 2013. Fees associated with the issue of the debt are included in the carrying amount of the debt and are amortized using the effective interest method.

b) In October 2009, the Company issued \$175 million of 7.75% Convertible Unsecured Subordinated Debentures (the "Convertible Debentures") for net proceeds of \$167.1 million. The Convertible Debentures mature on September 30, 2016, and interest is payable semi-annually on March 31 and September 30 in each year. Each debenture is convertible into common shares of the Company at the option of the holder at any time on or prior to the business day immediately preceding (i) maturity date; or (ii) the date specified for redemption of the Convertible Debentures, at a conversion price of \$25.75 being a conversion rate of 38.8350 common shares per \$1,000 principal amount of Convertible Debentures. During the nine months ended September 30, 2013, Convertible Debentures of \$82,000 principal were converted into 3,183 shares.

9. PENSION AND BENEFITS

The defined benefit pension plans are administered by the Master Trust, which is legally separated from the Company and is monitored by a pension committee. The pension committee is responsible for policy setting. The pension plans expose the Company to actuarial risk, currency risk, interest rate risk and market risk.

As at September 30, 2013, the Company determined its accrued benefit obligations related to the employee future benefit plans using a discount rate of 4.5% (December 31, 2012: 4.0%) and also determined the fair value of the defined benefit pension plan assets as at the statement of financial position date. This resulted in an actuarial gain on employee future benefit plans of \$1.9 million for the quarter ended September 30, 2013 (2012: loss of \$8.0 million) and \$9.3 million for the nine months ended September 30, 2013 (2012: loss of \$12.6 million), which was recorded net of tax through other comprehensive income (Note 20).

The benefit obligations and plan assets for the Company's pension and other post retirement benefit obligations are as follows:

(millions)	September 30 2013					
Present value of defined benefit pension obligations Present value of plan assets	\$ 112.2 86.9	\$ 119.9 86.4				
Other post retirement benefit obligations	25.3 5.0	33.5 5.2				
Defined benefit obligations, net	\$ 30.3	\$ 38.7				

10. SHAREHOLDERS' EQUITY

- a) At September 30, 2013 and December 31, 2012, the authorized share capital of the Company consisted of:
 - (i) an unlimited number of common shares without nominal or par value;
 - (ii) an unlimited number of Class I preferred shares without nominal or par value, issuable in series; and
 - (iii) an unlimited number of Class II preferred shares without nominal or par value, issuable in series.

The Directors have the authority to issue the Class I and Class II preferred shares in series and fix the designation, rights, privileges and conditions to be attached to each series, except that the Class I shares shall be entitled to preference over the Class II shares with respect to the payment of dividends and the distribution of assets in the event of liquidation, dissolution or winding-up of the Company.

b) The number of common shares issued and outstanding was as follows:

The number of common shares issued and odistanding was as folio	ws.			
		umber Shares		Amount millions)
Balance, December 31, 2012 Stock options exercised		04,636 32,433	\$	487.9 20.1

11. STOCK BASED COMPENSATION

a) Stock Options

The Company has a shareholder-approved share option plan, the purpose of which is to provide the employees of the Company and its subsidiaries with the opportunity to participate in the growth and development of the Company. The following is a continuity of options outstanding:

	Nu	Weighted Average Exercise Price		
	September 30 2013	December 31 2012	September 30 2013	December 31 2012
Balance, beginning of period Granted Exercised Expired or forfeited	3,055,428 389,607 (682,433) (48,072)	2,857,939 382,189 (132,550) (52,150)	\$ 25.92 28.99 24.63 27.87	\$ 25.44 26.18 15.31 28.78
Balance, end of the period	2,714,530	3,055,428	\$ 26.64	\$ 25.92
Exercisable	1,892,263	2,330,492	\$ 26.50	\$ 26.41

The outstanding options had an exercise price range as follows:

(number of options)	September 30 2013	December 31 2012
\$ 25.75 - \$ 33.81	2,036,587	2,227,065
\$ 15.86 - \$ 25.74	616,643	745,263
\$ 9.15 - \$ 15.85	61,300	83,100
Options outstanding	2,714,530	3,055,428

The Black-Scholes option-pricing model assumptions used to compute compensation expense under the fair value-based method are as follows:

	September 30 2013	December 31 2012
Dividend yield	5%	5%
Expected volatility	40%	41%
Expected life	5 yrs	5 yrs
Risk free rate of return	3.5%	3.5%
Weighted average fair value of options granted	\$ 7.21	\$ 6.78

The expected volatility is based on historical volatility over the last five years.

b) Deferred Share Units (DSU)

At September 30, 2013, there were 98,459 DSUs outstanding (December 31, 2012: 92,492). The liability and fair value of DSUs was \$2.7 million at September 30, 2013 (December 31, 2012: \$2.6 million). Dividends declared on common shares accrue to the units in the DSU plan in the form of additional DSUs.

c) Restricted Share Units (RSU)

At September 30, 2013, there were 122,176 RSUs issued and outstanding (December 31, 2012: 69,610). During the quarters ended September 30, 2013, and 2012 none of the RSUs matured. During the nine months ended September 30, 2013, none of the RSUs matured (September 30, 2012: 228,991). The RSU liability for vested RSUs at September 30, 2013 was \$2.4 million (December 31, 2012: \$1.3 million). The fair value of RSUs was \$3.3 million at September 30, 2013 (December 31, 2012: \$1.9 million). Dividends declared on common shares accrue to the units in the RSU plan in the form of additional RSU's.

12. EARNINGS PER SHARE

The following table provides the numerator and denominator used to compute basic and diluted earnings per share:

(millions)		Quarters ended September 30 2013 2012 (restated Note 2		nber 30 2012	Nine 2013	e months Septem (restate	
Net income used in calculation of basic earnings per share Interest and accretion expense, net of income taxes	\$	18.9 -	\$	22.4 -	\$ 60.5	\$	77.8 8.2
Net income used in calculation of diluted earnings per share	\$	18.9	\$	22.4	\$ 60.5	\$	86.0

In determining the diluted weighted average shares outstanding for the quarter ended September 30, 2013, 6,792,544 shares (2012: 6,796,117 shares) related to convertible debenture have been excluded since the effect was anti-dilutive. Interest and accretion related to convertible debentures for the quarter ended September 30, 2013 and 2012 have been excluded from net earnings used in the calculation of diluted earnings per share. For the nine months ended September 30, 2013, 6,792,544 shares related to convertible debentures and the interest and accretion thereon were excluded since the effect was anti-dilutive.

		Quarters ended September 30		months ended September 30
(number of shares)	2013	2012	2013	2012
Weighted average shares outstanding Dilution impact of stock options Dilution impact of convertible debentures	60,872,628 116,569 -	60,139,308 52,153 -	60,737,101 170,238 -	60,110,769 67,165 6,796,117
Diluted weighted average shares outstanding	60,989,197	60,191,461	60,907,339	66,974,051

13. EXPENSES

Details of expense items on the condensed consolidated statements of earnings are as follows:

(millions)	2013	Quarters Septem (restat		Nine 2013	Septer	s ended nber 30 2012 ted Note 2)
Employee Expenses Wages and salaries Other employee related costs	\$ 54.8 8.4	\$	43.7 7.3	\$ 156.7 27.3	\$	135.1 25.4
	\$ 63.2	\$	51.0	\$ 184.0	\$	160.5
Other Operating Expenses Plant and other expenses Delivery expenses Repairs and maintenance Selling expenses Professional fees Loss (gain) on sale of property, plant and equipment Foreign exchange gain	\$ 22.5 11.7 2.5 2.3 1.9 0.1 (0.4)	\$	13.9 12.4 2.4 1.6 1.7	\$ 63.7 37.0 7.7 6.9 4.8 (0.5) (0.3)	\$	42.6 38.6 7.4 5.1 4.5 (0.2)
	\$ 40.6	\$	31.9	\$ 119.3	\$	98.0

14. FINANCE EXPENSE

Finance expense (income) is comprised of the following:

(millions)	2013	Quarters Septen	ended nber 30 2012		 ended nber 30 2012
Interest at 6.0% on Senior Notes Interest at 7.75% on Convertible Debentures Interest at 6.375% on U.S. Senior Notes Other interest expense	\$ 4.7 4.4 -	\$	4.6 4.3 - 0.1	\$ 13.9 12.9 - 0.3	\$ 8.3 12.8 3.8 0.2
Interest expense	9.1		9.0	27.1	25.1
Interest income	(0.3)		(0.5)	(0.4)	(1.5)
Other finance expense Change in fair value of contingent consideration (Note 19)	(2.8)			0.3	4.8
Other finance (income) expense	(2.8)		-	0.3	4.8
Finance expense, net	\$ 6.0	\$	8.5	\$ 27.0	\$ 28.4

Interest expense on long-term debt is composed of the interest calculated on the face value of long-term debt, issue costs and accretion of the carrying value of the long-term debt. Long-term debt interest expense is charged to earnings using the effective interest method. Accretion and the amortization of issue costs for the quarters ended September 30, 2013 and 2012 was \$1.1 million and \$1.0 million, respectively and for the nine months ended September 30, 2013 and 2012 was \$3.2 million and \$3.1 million, respectively.

15. INCOME TAXES

The consolidated effective tax rates for the quarters ended September 30, 2013 and 2012 were 25.3% and 29.2%, respectively. The change in fair value of the contingent consideration was not tax effected which resulted in the effective tax rate for the quarter ended September 30, 2013 to be lower than the quarter ended September 30, 2012. For the nine months ended September 30, 2013 and 2012 the effective tax rates were 29.7% and 29.6%, respectively.

16. PROVISIONS AND OTHER NON-CURRENT LIABILITIES

(millions)	September 30 2013	December 31 2012
Contingent consideration (Note 19) Provision for decommissioning liabilities (Note 19) Deferred compensation and employee incentives Less: current portion of contingent consideration	\$ 43.1 2.8 4.7 (9.0)	\$ 42.9 5.0 3.9 (11.9)
	\$ 41.6	\$ 39.9

Deferred compensation includes the RSU and the DSU liabilities (Note 11). The RSUs that will be paid out in 2014 amounting to \$0.4 million have been reclassified as current accrued liabilities.

17. SEGMENTED INFORMATION

For the purpose of segment reporting, operating segments were identified as a component of an entity:

- that engages in business activities from which it may earn revenues and incur expenses;
- whose operating results are regularly reviewed by the Company's Chief Executive Officer to make decisions about resources to be allocated to the segment and assess its performance; and
- for which discrete financial information is available.

Accordingly, the Company conducts business in Canada and the U.S. in three business segments.

i) Metals service centers

The Company's network of metals service centers provides processing and distribution services on a broad line of metal products in a wide range of sizes, shapes and specifications, including carbon hot rolled and cold finished steel, pipe and tubular products, stainless steel and aluminium. The Company services all major geographic regions of Canada and certain regions in the Southeastern and Midwestern regions in the United States.

ii) Energy products

The Company's energy products operations distribute oil country tubular products, line pipe, tubes, valves, flanges and fittings, primarily to the energy industry in Western Canada and the United States.

iii) Steel distributors

The Company's steel distributors act as master distributors selling steel to customers in large volumes, mainly on an "as is" basis. Steel distributors source their steel domestically and offshore.

The Company has segmented its operations on the basis of management reporting and geographic segments in which it operates. For the quarter ended September 30, 2013, the inter-segment sales from steel distributors to metals service centers were \$8.3 million (2012: \$10.7 million) and for the nine months ended September 30, 2013 were \$21.2 million (2012: \$34.9 million). These sales, which are at market rates, are eliminated in the following table.

a) Results by business segment

		2013	Quarters Septem			Nine 2013	months ended September 30 2012

b) Fair Value

The fair value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate their carrying amounts because of the short-term maturity of these instruments.

The fair value measurement of contingent consideration obligations arising from business combinations is determined using unobservable (level 3) inputs. These inputs include (i) the estimated amount and timing of projected cashflows; (ii) the probability of the achievement of the factors on which the contingency is based; and (iii) the risk-adjusted discount rate used to present value the projected cashflows. Significant changes in any of these inputs in isolation can result in a significantly higher or lower fair value measurement. The fair value of the contingent consideration was calculated by applying the income approach using the probability weighted expected contingent consideration and a discount rate of 13.1%.

The fair value of long-term debt and related derivative instruments is set forth below.

Debt and Related Derivative Instruments Carrying Amounts

Amounts recorded in the condensed consolidated statements of financial position are referred to as "carrying amounts". The carrying amounts of primary debt are reflected in "Long-term debt" and "Current portion long-term debt".

Fair Value

The Company records its debt at amortized cost using the effective interest method. The fair value of long-term debt as at September 30, 2013 and December 31, 2012 was estimated based on the last quoted trade price, where it exists, or based on current rates available to the Company for similar debt with the same period to maturity.

The following summary reflects the fair value of long-term debt:

September 30, 2013

Primary Debt Instruments

(millions)	arrying Imount	 r value Level 1	Fair value Level 2		
6.0% \$300 million Senior Notes due April 19, 2022 7.75% \$175 million Convertible Debentures	\$ 293.8	\$ -	\$	303.0

Primary Debt Instruments

(millions)		arrying mount	ir value Level 1	Fair value Level 2		
6.0% \$300 million Senior Notes due April 19, 2022 7.75% \$175 million Convertible Debentures due September 30, 2016 Finance lease obligations	\$	293.4 157.8 4.6	\$ 207.8	\$	309.0 - 4.6	
Total	\$	455.8	\$ 207.8	\$	313.6	
Current portion Long-term portion	\$ \$	2.2 453.6				

c) Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. Credit risk arises from cash and cash equivalents and derivative financial instruments, as well as credit exposure to customers including accounts receivables.

The Company attempts to minimize credit exposure as follows:

- Cash investments are placed with high-quality financial institutions, with limited exposure to any one institution. At September 30, 2013, nearly all cash and cash equivalents held were issued by institutions that were rated R1 High by DBRS;
- Counterparties to derivative contracts are members of the syndicated credit facility (Note 7);
- Credit limits minimize exposure to any one customer; and
- The customer base is geographically diverse and in different industries.

In order to minimize the risk of uncollectability of trade receivables, the Company performs regular credit reviews of all customers with significant credit limits. Provisions for and write-offs of trade receivables are done on a case by case basis taking into account a customer's past credit history and current ability to pay. No allowance for credit losses on financial assets was required as of September 30, 2013 and December 31, 2012, other than the allowance for doubtful accounts. As at September 30, 2013, trade accounts receivable greater than 90 days represented less than 3% of trade accounts receivable (December 31, 2012: 4%).

d) Interest rate risk

Interest rate risk is the risk that the fair value of the future cash flows of a financial instrument will fluctuate because of changes in market rates of interest. The Company is not exposed to significant interest rate risk. The Company's long-term debt is at fixed rates. The Company's short-term bank borrowings, net of cash and cash equivalents used to finance working capital, are at floating interest rates.

e) Foreign exchange risk

Foreign exchange risk is the risk that the fair value of the future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company uses foreign exchange contracts with maturities of less than one year to manage foreign exchange risk on certain future committed cash outflows. As at September 30, 2013, the Company had outstanding forward foreign exchange contracts in the amount of US\$37.4 million in 2013 (December 31, 2012: US\$14.1 million). A 1% change in foreign exchange rates would not result in a significant increase or decrease in accounts payable or net earnings.

f) Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations when due. Liquidity adequacy is assessed in view of seasonal needs, growth requirements, capital expenditures and the maturity profile of indebtedness. A centralized treasury function ensures that the Company maintains funding flexibility by assessing future cash flow expectations and by maintaining its committed borrowing facilities. Cash is managed by the centralized treasury function and is invested in money market instruments or bank deposits, with durations ranging from current to sixty days.

As at September 30, 2013, the Company was contractually obligated to make payments under its financial liabilities that come due during the following periods:

(millions)	ccounts Payable	Indebt	Bank edness	Lon Debt Ma	g-Term aturities	g-Term nterest	-	erating Lease gations	Total
2013	\$ 365.3	\$	20.6	\$	-	\$ 9.0	\$	4.9	\$ 399.8
2014	-		-		-	31.6		16.9	48.5
2015	-		-		-	31.6		13.7	45.3
2016	-		-		174.9	31.6		11.3	217.8
2017	-		-		-	18.0		8.1	26.1
2018 and beyond	-		-		300.0	81.9		26.8	408.7
Total	\$ 365.3	\$	20.6	\$	474.9	\$ 203.7	\$	81.7	\$ 1,146.2

As at September 30, 2013, the Company was contractually obligated to make payments under finance leases as follows:

(millions)	
2013	\$ 0.6
2014 2015 2016	1.2 1.0
2016	0.5 0.3
Total minimum lease payments Interest at rates varying between 1.8% and 14.5%	3.6 (0.4)
Net minimum lease payments Less: current portion	3.2 (1.4)
Long-term portion	\$ 1.8

At September 30, 2013, the Company was contractually obligated to repay its letters of credit under both of its bank facilities at maturity (Note 7). The Company is contractually obligated to pay the contingent consideration related to business acquisitions (Note 19).

g) Capital management

The Company manages capital in order to safeguard its ability to continue as a going concern, provide returns to shareholders through its dividend policy and provide the ability to finance future growth. Capital includes shareholders' equity, bank indebtedness and long-term debt, net of cash. The Company manages its capital structure and may make adjustments to the amount of dividends paid to shareholders, purchase shares for cancellation pursuant to issuer bids, issue new shares, issue new debt, repurchase existing debt and extend or amend its credit facilities.

19. CONTINGENCIES, COMMITMENTS AND GUARANTEES

a) Lawsuits and legal claims

The Company and certain of its subsidiaries have been named defendants in a number of legal actions. Although the outcome of these claims cannot be determined, management intends to defend all claims and has recorded provisions based on its best estimate of the potential losses. In the opinion of management, the resolution of these matters is not expected to have a material adverse effect on the Company's financial position, cash flows or operations.

The Company has also entered into other agreements that provide indemnifications to counterparties in certain transactions including underwriting agreements. These indemnifications generally require the Company to indemnify the counterparties for costs incurred as a result of losses from litigation that may be suffered by counterparties arising from those transactions except in the case of gross negligence by the counterparties. The Company does not expect to make any payments on these indemnifications and accordingly, no liability has been accrued.

b) Decommissioning liability

The Company incurs site cleanup and restoration costs related to properties not utilized in current operations. Remedial actions are currently underway at three sites. Decommissioning liabilities have been estimated using discounted cash flow valuation techniques for cleanup costs based on management's best estimates of the amounts required to settle the liabilities. During the quarter ended June 30, 2013, a settlement was reached related to clean up costs at a previously disposed property in Whitehorse, Yukon. This settlement was provided for in previous years. Under the settlement agreement the Company paid \$2.0 million into escrow, for the purpose of funding remediation activities. The Company was released from any remediation expense beyond that amount and accordingly the decommissioning liability was reduced.

The Company has asset retirement obligations relating to the land lease for its Thunder Bay Terminal operations whose lease term expires in 2031. The landlord has the option to retain the equipment or to require the Company to remove it. In addition, the Company has end-of-lease obligations in certain service center operations.

c) Business combinations and investments

The Company may have an obligation to pay additional consideration for its acquisitions of Apex Distribution and Norton Metals based upon achievement of contractually agreed performance measures ending on December 31, 2013, for the Norton Metals acquisition and December 31, 2017, for the Apex Distribution acquisition. The Company's obligation for the contingent consideration relating to the Norton Metals acquisition is a maximum of US\$4.1 million and there is no maximum for the Apex Distribution acquisition. The continuity of accrued contingent consideration is as follows:

(millions)	Apex		Norton Metals		Septem	Total ber 30 2013	Total December 31 2012	
Balance, beginning of the period Business acquisition (Note 3) Paid during the period Change in fair value Effect of movements in exchange rates	\$	41.9 0.3 - 0.6	\$	1.0 - (0.3) (0.3) (0.1)	\$	42.9 0.3 (0.3) 0.3 (0.1)	\$	1.6 41.4 (0.5) 0.5 (0.1)
Balance, end of the period	\$	42.8	\$	0.3	\$	43.1	\$	42.9

37

The change in fair value includes an adjustment to reflect accretion for the time value of money of \$4.6 million offset by a reduction of the liability of \$4.0 million recognized during the quarter. This reduction relates to a decrease in the expected cash payment for Apex Distribution, due to lower than forecasted earnings during 2013.

The undiscounted expected cash outflow relating to Apex Distribution's contingent consideration is estimated to be \$56.2 million (December 31, 2012: \$60.2 million).

20. OTHER COMPREHENSIVE INCOME (LOSS)

Income taxes on other comprehensive income (loss) are as follows:

(millions)	2013	Quarters ended September 30 2012 (restated Note 2)			Nine 2013	e months ended September 30 2012 (restated Note 2)
