CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

Statements contained in this press release or on the related conference call that relate to Russel Metals' beliefs or expectations as to certain future events are not statements of historical fact and are forward-looking statements. Russel Metals cautions readers that there are important factors, risks and uncertainties, including but not limited to economic, competitive and governmental factors affecting Russel Metals' operations, markets, products, services and prices that could cause its actual results, performance or achievements to be materially different from those forecasted or anticipated in such forward-looking statements.

The forward-looking statements in this document reflect management's current beliefs and are based on information currently available to management. The material assumptions applied in making the forward-looking statements in this document include the following: demand from the manufacturing, resource and construction segments of the Canadian economy remains at current levels and these conditions will continue in the foreseeable future; and oil and gas prices, the price of steel and the value of the Canadian dollar relative to the U.S. dollar will be stable and at similar levels with what we experienced at the end of the 2013 second quarter. Although the forward-looking statements contained in this document are based upon what management believes to be reasonable estimates and assumptions, Russel Metals cannot ensure that actual results will not be materially different from those expressed or implied by these forward-looking statements and does not intend to update any forward-looking statement other than required by law.

NOTES

In this Information Package we use certain financial measures that do not comply with Canadian generally accepted accounting principles (GAAP) or have standardized meanings, and thus, may not be comparable to similar measures presented by other issuers, for example EBIT and EBITDA and Other Information in the Financial Summary. Management believes that EBIT and EBITDA may be useful in assessing our operating performance and as an indicator of our ability to service or incur indebtedness, make capital expenditures and finance working capital requirements. EBIT and EBITDA should not be considered in isolation or as an alternative to cash from operating activities or other combined income or cash flow data prepared in accordance with Canadian GAAP. EBIT, EBITDA and a number of the ratios provided under Other Information are used by debt and equity analysts to compare our performance against other public companies.

Definitions

Adjusted EBIT and EBITDA – EBIT and EBITDA adjusted to exclude 2010 inventory reversal of \$1.9 million and plant closure costs of \$2.6 million.

Basic Earnings Per Common Share - Earnings divided by Average common shares outstanding in period.

Book Value Per Share - Equity value divided by ending common shares outstanding.

Debt as % of Capitalization - Total interest bearing debt excluding cash divided by common shareholders' equity plus interest bearing debt excluding cash.

Dividend Per Share - The current quarterly dividend annualized.

Dividend Yield - The dividend per share divided by the period end common share price.

Earnings Multiple - Period ending common share price divided by basic earnings per common share.

EBIT - Earnings from operations before deduction of interest and income taxes.

EBITDA - Earnings from operations before deduction of interest, income taxes, depreciation and amortization.

Free Cash Flow - Cash from operating activities before change in working capital less inventory write-downs and capital expenditures.

Interest Bearing Debt to EBITDA - Total interest bearing debt excluding cash on hand divided by EBITDA.

Market Capitalization - Outstanding common shares times market price of a common share at period end.

Net Assets Employed - Assets less liabilities excluding debt and cash.

Return on Capital Employed - EBIT for period annualized over net assets employed.

COMMENTS RE MARKET CONDITIONS AUGUST 2013

1. Economic slowdown impacts demand. Q2 MSCI industry shipments, down 8% for Canada, 3% for US. Russel Metals service centers down 4%.
2. Demand down 7 % year to date. Q2 up from Q1 2013.
3. Pricing low but stable.
4. Drilling activity lower than last year due to wet weather. Expect improvement in fall.

Russel Metals

HIGHLIGHTS 2013 SECOND QUARTER RESULTS

1. QTR-2 2013 - Earnings \$19.9 million, EPS \$0.33
QTR-2 2012 - Earnings \$22.5 million, EPS \$0.37
QTR-1 2013 - Earnings \$21.7 million, EPS \$0.36
2. Six months June 30, 2013 – Earnings \$41.6 million, EPS \$ 0.69
Six months June 30, 2012 – Earnings \$55.4 million, EPS \$ 0.92
3. Free Cash Flow
(cash from operations before working capital changes less capital expenditures)
Six months June 30, 2013 - \$49.8 million or \$0.82 per share
Six months June 30, 2012 - \$54.2 million or \$0.90 per share
4. Return on Equity – 10%
5. Cash and cash equivalents, net of bank debt - \$139 million

RUSSEL METALS INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS
FOR THE SIX MONTHS ENDED JUNE 30, 2013

This Management's Discussion and Analysis of Financial Condition and Results of Operations of Russel Metals Inc. and its subsidiaries provides information to assist readers of, and should be read in conjunction with, the condensed consolidated financial statements for the six months ended June 30, 2013 including the notes thereto, and the Management's Discussion and Analysis and the audited consolidated financial statements for the year ended December 31, 2012, including the notes thereto. In the opinion of management, such condensed consolidated financial statements contain all adjustments necessary for a fair presentation of the results for such periods. The results of operations for the periods shown are not necessarily indicative of what our results will be for the full year. All dollar references in this report are in Canadian dollars unless otherwise stated.

Additional information related to Russel Metals Inc., including our Annual Information Form, may be obtained from SEDAR at www.sedar.com or on our website at www.russelmetals.com.

Unless otherwise stated, the discussion and analysis contained herein are as of August 7, 2013.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this document constitute forward-looking statements or information within the meaning of applicable securities laws. These statements relate to future events or our future performance. All statements other than statements of historical fact may be forward-looking statements. Forward looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. These risks and uncertainties include, among other things: no assurance future financing will be available; dilution; change of control; interest rate risk; foreign exchange risk; volatile metal prices; cyclical nature of the metals industry and the industries that purchase our products; significant competition; interruption in sources of metals supply; integrating future acquisitions; collective agreements and work stoppages; environmental liabilities; changes in government regulations; failure of key computer-based systems; loss of key individuals; and the current economic climate. While we believe that the expectations reflected in the forward-looking statements contained herein are reasonable, no assurance can be given that these expectations will prove to be correct, and such forward-looking statements included herein should not be unduly relied upon. These statements speak only as of the date hereof. Except as required by law, we do not assume any obligation to update the aforementioned forward-looking statements. Our actual results could differ materially from those anticipated in the aforementioned forward-looking statements, as applicable, including as a result of the risk factors set forth elsewhere herein and in our filings with the securities regulatory authorities which are available on SEDAR at www.sedar.com.

NON-GAAP MEASURES

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes a number of measures that are not prescribed by GAAP and as such may not be comparable to similar measures presented by other companies. We believe these measures are commonly employed to measure performance in our industry and are used by analysts, investors, lenders and other interested parties to evaluate financial performance and our ability to incur and service debt to support our business activities. The measures we use are specifically defined where they are first used in this report.

While we believe that non-GAAP measures are helpful supplemental information, they should not be considered in isolation as an alternative to net income, cash flows generated by operating, investing or financing activities, or other financial statement data presented in accordance with GAAP.

OVERVIEW

We are one of the largest metals distribution companies in North America. We conduct business primarily in three metals distribution segments: metals service centers; energy products; and steel distributors.

Our basic earnings per share were \$0.33 for the quarter ended June 30, 2013 compared to \$0.37 for the same quarter of 2012. Earnings in the second quarter of 2012 included a charge of \$0.07 for deferred costs, hedging costs and additional interest related to the redemption of our U.S. Senior Notes.

Earnings were impacted by lower demand and selling prices at our metals service centers and our steel distributors segments. We have seen a decline in activity across North America which started in late 2012. Our energy products revenues increased due to the acquisition of Apex Distribution.

For the six months ended June 30, 2013, our basic earnings per share were \$0.69 compared to \$0.92 for the same period in 2012. The significant decline was largely as a result of two factors: demand and reduced margins.

RESULTS OF OPERATIONS

The following table provides revenues, operating profits before interest, taxes and other finance income or expense. The corporate expenses included are not allocated to specific operating segments. Gross margins (revenue minus cost of sales) as a percentage of revenues and operating profits as a percentage of revenues are also shown. The table shows the segments as they are reported to management and are consistent with the segment reporting in the condensed consolidated financial statements.

Note: 2012 restatement relates to adoption of new Employee Benefits standard. See Note 2 to financial statements.

METALS SERVICE CENTERS

a) *Description of operations*

We provide processing and distribution services to a broad base of approximately 39,000 end users through a network of 54 Canadian locations and 12 U.S. locations. Our metals service centers carry a broad line of products in a wide range of sizes, shapes and specifications, including carbon hot rolled and cold finished steel, pipe and tubular products, stainless steel and aluminum. We purchase these products primarily from steel producers in North America and process and package them in accordance with end user specifications. We service all major geographic regions of Canada and the Southeastern and Midwestern regions in the United States. Within Canada, our service centers operate under the names Russel Metals, Métaux Russel, A.J. Forsyth, Acier Leroux, Acier Loubier, Acier Richler, Alberta Industrial Metals, B&T Steel, Leroux Steel, Mégantic Métal, Russel Metals Specialty Products, Métaux Russel Produits Spécialisés, McCabe Steel, Siemens Laserworks and York-Ennis. Our U.S. service centers operate under the names Russel Metals Williams Bahcall, JMS Russel Metals, Norton Metals and Baldwin International.

b) *Factors affecting results*

The following is a general discussion of the significant factors affecting our metals service centers results. More specific information on how these factors impacted the second quarter of 2013 and 2012 is found in the sections that follow.

Steel prices fluctuate significantly throughout the steel cycle. Mill price reductions put downward pressure on selling prices and gross margins. Steel prices declined slightly during the first half of 2013; however, they were approximately 8% below the first half of 2012. Steel prices are influenced by overall demand, trade sanctions, iron ore prices, scrap steel prices and product availability. Supply side management, practiced by steel producers in North America, and international supply and demand, which impacts steel imports, affects product availability. Trade sanctions are initiated either by steel mills or by government agencies in North America.

Demand for our product is significantly affected by economic cycles. Revenues and operating profits fluctuate with the level of general business activity in the markets served. We are most impacted by the manufacturing, resource and construction segments of the Canadian economy.

Canadian service centers, which represent the majority of our metals service center operations, have operations in all regions of Canada and are affected by specific regional economic conditions. Our large market share and diverse customer base of approximately 22,000 customers mean that our results tend to mirror the performance of the regional economies of Canada. Our U.S. operations, which have approximately 17,000 customers, are impacted by the local economic conditions in the regions that they serve.

The decline of the Canadian dollar in the second quarter of 2013 versus the same period in 2012 had no material impact on revenues and profits for our U.S. operations translated to Canadian dollars. Revenues and profits of our U.S. operations reported for the six months ended June 30, 2013 were converted at \$1.0161 per US\$1 compared to \$1.0057 per US\$1 for the same period of 2012. The exchange rate at June 30, 2013 used to translate the balance sheet was \$1.0512 per US\$1 versus \$0.9949 per US\$1 at December 31, 2012.

Our Canadian operations are affected by the U.S. dollar exchange rate since some products are sourced outside of Canada and are priced in U.S. dollars. Movement in the Canadian dollar has a short-term impact on inventory prices.

c) *Metals service centers segment results -- Three Months Ended June 30, 2013 Compared to June 30, 2012*

Revenues for the three months ended June 30, 2013 decreased 13% to \$378 million compared to the same period in 2012. Tons shipped in the metals service centers segment in the second quarter of 2013 were approximately 4% lower than the second quarter of 2012. The average selling price of metal for the three months ended June 30, 2013 was approximately 9% lower than the average selling price for the three months ended June 30, 2012. The reduction in tons shipped and lower selling prices was a result of the general economic slowdown in 2013. The reduction in tons shipped was more pronounced in the Atlantic, Quebec and Ontario regions. The Metals Service Center Institute reported a decrease in tons shipped for the industry of 8% in Canada and 3% in the U.S. for the 2013 second quarter which was greater than our decline in shipments in this period.

Gross margin dollars for the second quarter of 2013 were \$11 million lower than the second quarter of 2012 due to lower selling prices and volumes. Gross margin as a percentage of revenues at 20.4% were consistent with the second quarter of 2012.

Operating expenses in the second quarter of 2013 were lower by \$1 million or 2.3% than in the second quarter of 2012, mainly related to lower variable compensation.

Metals service centers operating profit for the three months ended June 30, 2013 of \$21 million compares to \$31 million for the same period in 2012 and reflects lower steel pricing and volumes. The second quarter service center operating profits were \$3 million higher than the first quarter of 2013.

d) *Metals service centers segment results -- Six Months Ended June 30, 2013 Compared to June 30, 2012*

Revenues for the six months ended June 30, 2013 were \$737 million compared to \$860 million for the same period in 2012. Tons shipped in the metals service centers segment in the six months ended June 30, 2013 were approximately 7% lower than the same period of 2012. The average selling price of metal for the six months ended June 30, 2013 was approximately 8% lower than the average selling price for the six months ended June 30, 2012.

Gross margin as a percentage of revenues was 20.6% for the six months ended June 30, 2013 compared to 20.7% for the same period in 2012.

Operating expenses for the six months ended June 30, 2013 decreased 2.2% compared to the same period in 2012, mainly related to lower variable compensation.

Metals service centers operating profit for the six months ended June 30, 2013 decreased to \$39 million compared to \$63 million for the same period in 2012 a result of lower steel pricing and volumes.

ENERGY PRODUCTS

a) *Description of operations*

These operations distribute oil country tubular goods (OCTG), line pipe, tubes, valves and fittings, primarily to the energy industry in Western Canada and the United States. A significant portion of our business units are clustered in Alberta in Canada and Colorado and Texas in the U.S. A large portion of our pipe inventories are located in third party yards ready for distribution to customers throughout North America. In addition, we operate from 53 Canadian and 19 U.S. facilities mainly to support our valve and fitting operations. The majority of these facilities are oil field stores to support the Apex Distribution network. We purchase our products from the pipe division of North American steel mills, independent manufacturers of pipe, valve and fittings, international steel mills or other distributors. Our energy products segment operates under the names Apex Distribution, Apex Remington, Comco Pipe and Supply Company, Fedmet Tubulars, Triumph Tubular & Supply, Pioneer Pipe and Spartan Energy Tubulars.

b) *Factors affecting results*

The following is a general discussion of the factors affecting our energy products segment operations. More specific information on how these factors impacted the second quarter of 2013 and 2012 is found in the sections that follow.

The price of natural gas and oil can impact rig count and drilling activities, particularly in Western Canada. Rig activity affects demand for our products. The price of oil was high during 2012 but softened in the first half of 2013 resulting in lower 2013 rig activity. Activity in Western Canada is dependent on Canadian oil prices which were below U.S. oil prices during the first half of 2013 due to a shortage of pipeline capacity. Natural gas prices, while up marginally from year end, are at low levels and consequently drilling activity related to gas remained below historical levels. Fracking technology, applied to horizontal drilling, enables producers to economically drill in the oil and gas-rich shale fields and remains the focus of our OCTG sales efforts. Sales of large diameter pipe for use in distribution feeder lines has been an active area for our U.S. operations as new shale fields are developed and their output connected to the existing pipelines.

Prices for pipe products are influenced by overall demand, trade sanctions and product availability. Trade sanctions are initiated either by steel mills or by government agencies in North America. Both the Canadian and U.S. governments have imposed duties on certain Chinese pipe, which remain in effect and reduce imports of these products. The U.S. government has also initiated a review of pipe from India, Korea and a number of other countries. Pricing of valves and fittings are not as sensitive to steel price fluctuations.

Our Canadian operations can be affected by the U.S. dollar exchange rate since some products are sourced outside of Canada and are priced in U.S. dollars. Movement in the Canadian dollar impacts the cost of inventory and cost of sales.

Drilling related to oil and natural gas in Western Canada historically peaks during the period from October to March. This segment was impacted by excess water and flooding in Western Canada in June 2013.

c) *Energy products segment results -- Three Months Ended June 30, 2013 Compared to June 30, 2012*

Energy products segment revenues increased 63% to \$313 million for the second quarter of 2013 compared to the same period in 2012 primarily due to the acquisition of Apex Distribution. Revenues in our energy products segment on a same store basis were 11% higher than the same period last year. Increased revenue from our Canadian operation servicing the oil sands accounted for this difference. Revenues in the second quarter of 2013 were 20% lower than the first quarter of 2013 due to the spring break up.

Gross margin as a percentage of revenues for the three months ended June 30, 2013 was 15.9% compared to 13.9% for the same period in 2012 due to higher margins at the Apex Distribution operations than the other energy products operations. Margins excluding Apex Distribution were 11.9% for the 2013 second quarter due to a highly competitive market and reductions in demand.

Operating expenses as a percentage of revenues were 10.4% versus 8.5% in the second quarter of 2012, which reflect the higher operating expenses in the Apex Distribution operations. On a same store basis operating expenses were 7.4%, an improvement from last year.

This segment generated an operating profit of \$17 million for the three months ended June 30, 2013, compared to \$11 million for the same period in 2012. Operating profits were up due to the contribution of Apex Distribution and strong results from our Comco Pipe and Supply operation compared to 2012.

d) *Energy products segment results -- Six Months Ended June 30, 2013 Compared to June 30, 2012*

Energy products segment revenues increased 51% to \$702 million for the six months ended June 30, 2013 compared to the same period in 2012. On a same store basis revenues are higher by 4% mainly related to our Canadian operation servicing the oil sands. Revenues from our Canadian operations servicing oil and gas drilling activity decreased 3% compared to 2012.

Gross margin as a percentage of revenues for the six months ended June 30, 2013 was 15.6% compared to 13.8% for the same period in 2012 due to higher margins at the Apex Distribution operations.

Operating expenses on a same store basis improved to 6.8% versus 7.5% in 2012. Apex Distribution has a higher operating expense component so the percentage reported increased to 9.7%. Apex Distribution's higher costs are more than offset by higher margins.

Operating profit was \$42 million for the six months ended June 30, 2013 compared to \$29 million for the same period in 2012.

STEEL DISTRIBUTORS

a) *Description of operations*

Our steel distributors act as master distributors selling steel in large volumes to other steel service centers and equipment manufacturers mainly on an "as is" basis. Our U.S. operation has a cut-to-length facility in Houston, Texas where it processes coil for its customers. Our steel distributors source their steel both domestically and off shore.

The main steel products sourced by this segment are structural beam, plate, coils, pipe and tubing; however, product volumes vary based on the economy and trade actions in North America. Our steel distributors operate under the names Wirth Steel and Sunbelt Group. Arrow Steel, a division of Sunbelt Group, processes coils.

b) Factors affecting results

The following is a general discussion of the factors affecting our steel distributors. More specific information on how these factors impacted the second quarter of 2013 and 2012 is found in the sections that follow.

Steel prices are influenced by overall demand, trade sanctions and product availability both domestically and worldwide. Trade sanctions are initiated either by steel mills or government agencies in North America. Trade actions currently exist on plate and pipe from specified countries. Mill capacity by product line in North America, as well as international supply and demand, impact steel imports. In addition, these factors significantly affect product availability in North America. Current lead times for deliveries from North American mills are short due to excess capacity, reducing demand for imports.

Demand for steel that is sourced off shore fluctuates significantly and is mainly driven by price and product availability in North America. Our steel distributors have a significant number of customers who buy product from them on a periodic basis, which can result in large fluctuations in revenues reported from period to period.

Our Canadian operations source product outside of Canada that is priced in U.S. dollars. Movements in the Canadian dollar can result in some products that we have purchased being subsequently available in the marketplace at a lower cost.

c) Steel distributors segment results -- Three Months Ended June 30, 2013 Compared to June 30, 2012

Steel distributors revenues decreased 29% to \$65 million for the three months ended June 30, 2013 compared to the three months ended June 30, 2012 due short lead times and availability from North American mills coupled with lower demand.

Gross margin as a percentage of revenues was 13.2% for the three months ended June 30, 2013 compared to 13.9% for the three months ended June 30, 2012. The decline related to lower steel pricing due to weaker demand for steel.

Operating expenses were \$1 million lower for the second quarter of 2013 compared to the second quarter of 2012, mainly related to lower variable compensation due to lower earnings.

Operating profit for the three months ended June 30, 2013 was \$5 million, compared to \$8 million for the three months ended June 30, 2012 reflecting lower demand and gross margins in the current quarter compared to the 2012 second quarter.

d) Steel distributors segment results -- Six Months Ended June 30, 2013 Compared to June 30, 2012

Revenues for the six months ended June 30, 2013 decreased 28% to \$139 million compared to the six months ended June 30, 2012 due to lower demand in both Canada and the U.S.

Gross margin as a percentage of revenues decreased to 12.9% for the six months ended June 30, 2013 compared to 14.7% for the same period in 2012. The decline related to weaker demand and lower pricing.

Operating expenses were \$2 million lower for the six months ended June 30, 2013 compared with the same period in 2012 mainly related to lower variable compensation.

Operating profit for the six months ended June 30, 2013 was \$10 million, compared to \$18 million for the six months ended June 30, 2012.

Corporate Expenses -- Three and Six Months Ended June 30, 2013 Compared to June 30, 2012

Corporate expenses were \$3 million for the three months ended June 30, 2013 compared to \$4 million in 2012. For the six months ended June 30, 2013 corporate expenses of \$7 million were lower than the \$12 million for the six months ended June 30, 2012. Corporate expenses for the first half were lower mainly due to lower variable compensation related to lower earnings.

Consolidated Results -- Three and Six Months Ended June 30, 2013 Compared to June 30, 2012

Operating profits were \$40 million for the three months ended June 30, 2013 compared to \$46 million for the three months ended June 30, 2012. Operating profits for the six months ended June 30, 2013 were \$82 million compared to \$99 million for the same period in 2012.

INTEREST EXPENSE AND INCOME

Net interest expense was \$9 million for the three months ended June 30, 2013 and June 30, 2012. Net interest expense was \$18 million for the six months ended June 30, 2013 compared to \$15 million for the same period in 2012 reflecting the higher debt outstanding after the issue of the Canadian Senior Notes in April 2012.

OTHER FINANCE EXPENSE

Other finance expense was \$1 million for the three months ended June 30, 2013 due to the imputed interest cost associated with the contingent consideration related to our Apex Distribution acquisition. In the second quarter of 2012 other finance expense was \$4 million related to costs associated with the redemption of the U.S. Notes. Other finance expense was \$3 million for the six months ended June 30, 2013 compared to \$5 million in the six months ended June 30, 2012.

INCOME TAXES

We recorded a provision for income taxes of \$10 million for the second quarter of 2013 and 2012. Our effective income tax rate for the three months ended June 30, 2013 was 32.5% and for the six months ended June 30, 2013 was 31.4%. The effective income tax rate in 2013 is higher than the 29.8% income tax rate for the six months ended June 30, 2012 due to the finance expense on Apex Distribution contingent consideration which does not generate a tax benefit. We estimate our normalized effective income tax rate, excluding the finance expense, to be 28.5% for 2013.

NET EARNINGS

Net earnings for the second quarter of 2013 were \$20 million compared to \$23 million in the second quarter of 2012. Basic earnings per share for the second quarter of 2013 were \$0.33 per share compared to \$0.37 per share for the second quarter of 2012. Basic earnings per share for the six months ended June 30, 2013 were \$0.69 per share compared to \$0.92 for the same period last year.

SHARES OUTSTANDING AND DIVIDENDS

The weighted average number of common shares outstanding for the second quarter of 2013 was 60,844,045 compared to 60,089,859 for the second quarter of 2012. The weighted average number of common shares outstanding for the six months ended June 30, 2013 was 60,668,215 compared to 60,096,342 for the six months ended June 30, 2012. The number of common shares outstanding increased as a result of options exercised. As at June 30, 2013 and August 7, 2013, we had 60,866,902 common shares outstanding.

We paid common share dividends of \$21 million or \$0.35 per share in the second quarter of 2013 as compared to \$21 million or \$0.35 per share in the second quarter of 2012.

We have \$175 million of 7.75% Convertible Unsecured Subordinated Debentures outstanding which mature on September 30, 2016. Each debenture is convertible into common shares at the option of the holder at any time on or prior to the business day immediately preceding (i) the maturity date, or (ii) the date specified for redemption of the Convertible Debentures, at a conversion price of \$25.75 per share being a conversion rate of 38.8350 common shares per \$1,000 principal amount of Convertible Debentures.

We have \$300 million of 6.0% Senior Notes due April 19, 2022. The indenture for our Senior Notes has restrictions related to quarterly dividends in excess of \$0.35 per share. We currently have a basket of approximately \$147 million available for restricted payments, which is adjusted for 50% of our net earnings or losses on a quarterly basis. This basket would be available for increased dividend payments.

Under our syndicated bank facility, the payment of dividends is subject to excess borrowing base availability of not less than four times the declared dividend. We do not believe this requirement will restrict our ability to pay a dividend as our borrowing base, which is based on percentages of accounts receivable and inventories, has traditionally been in excess of borrowings plus four times the current dividend.

EBITDA

The following table shows the reconciliation of net earnings to EBITDA and adjusted EBITDA:

<i>(millions)</i>	Quarters Ended June 30		Six Months Ended June 30	
	2013	2012	2013	2012
Net earnings for the period	\$ 19.9	\$ 22.5	\$ 41.6	\$ 55.4
Provision for income taxes	9.6	10.3	19.1	23.5
Interest and finance expense, net	10.7	13.2	21.0	19.9
Earnings before interest, finance and income taxes (EBIT)	40.2	46.0	81.7	98.8
Depreciation and amortization	8.2	6.1	16.4	11.8
Earnings before interest, finance, income taxes, depreciation and amortization (EBITDA)	\$ 48.4	\$ 52.1	\$ 98.1	\$ 110.6

We believe that EBITDA, a non-GAAP measure, may be useful in assessing our operating performance and as an indicator of our ability to service or incur indebtedness, make capital expenditures and finance working capital requirements. The items excluded in determining EBITDA are significant in assessing our operating results and liquidity. Therefore, EBITDA should not be considered in isolation or as an alternative to cash from operating activities or other combined income or cash flow data prepared in accordance with GAAP.

CAPITAL EXPENDITURES

Capital expenditures were \$14 million for the six months ended June 30, 2013 compared to \$21 million in the same period of 2012. Depreciation expense was \$14 million for the six months ended June 30, 2013 compared to \$11 million in the same period in 2012. The increase in depreciation expense relates to acquisitions made in 2012. Our expectation is for capital expenditures to approximate depreciation expense over the long term.

LIQUIDITY

At June 30, 2013, we had cash of \$161 million compared to \$115 million at December 31, 2012. As at June 30, 2013, we had bank indebtedness of \$22 million compared to indebtedness of \$14 million at December 31, 2012 resulting in an increase in net cash of \$38 million.

We generated cash of \$31 million from operations in the second quarter of 2013 and generated \$24 million from reducing working capital. We utilized \$7 million investing in capital expenditures and returned \$21 million through dividends to shareholders.

Our metals distribution business experiences significant swings in working capital which impact cash flow. Inventory and accounts receivable represent a large percentage of our total assets employed and vary throughout each cycle. Accounts receivable and inventory comprise our largest liquidity risks. Our customers are impacted by the economic climate and thus it is possible to experience additional bad debts and increased days outstanding for accounts receivable, which may affect the timing of collections. Total assets were \$1.8 billion at June 30, 2013 and December 31, 2012. At June 30, 2013 and December 31, 2012, current assets excluding cash represented 73% of our total assets excluding cash.

Inventory generated \$6 million in cash in the six months ended June 30, 2013. The inventory balance increased due to the change in foreign exchange on inventories of our U.S. operations at June 30, 2013 compared to December 31, 2012. Inventories represented 43% of our total assets at June 30, 2013 and December 31, 2012.

<i>Inventory by Segment</i>	June 30 2013	Mar. 31 2013	Dec. 31 2012	Sept. 30 2012	June 30 2012
Metals service centers	\$ 255	\$ 268	\$ 274	\$ 286	\$ 294
Energy products	427	420	411	350	341
Steel distributors	88	84	79	87	88
Total operations	\$ 770	\$ 772	\$ 764	\$ 723	\$ 723

<i>Inventory Turns by Segment</i>	Quarters Ended				
	June 30 2013	Mar. 31 2013	Dec. 31 2012	Sept. 30 2012	June 30 2012
Metals service centers	4.7	4.2	3.9	4.3	4.7
Energy products	2.5	3.1	3.4	2.5	1.9
Steel distributors	2.6	3.1	3.6	3.1	3.6
Total operations	3.2	3.5	3.6	3.3	3.3

At June 30, 2013, our metals service centers had slightly lower inventory tons compared to December 31, 2012. This segment has reduced inventory levels in conjunction with the decline in demand.

Our energy products operations had inventory at the end of the second quarter of 2013, which was 4% higher than December 31, 2012. These operations were anticipating a strong June which did not occur due to wet weather.

Our steel distributors segment had slightly higher inventory levels compared to December 31, 2012 and the same level as June 30, 2012; however, turns declined due to lower revenues.

Accounts receivable generated cash of \$44 million for the six months ended June 30, 2013 due to a decline in revenues in our energy segment during the second quarter of 2013. Accounts receivable represented 23% of our total assets at June 30, 2013 compared to 25% of our total assets at December 31, 2012.

During the six months ended June 30, 2013, we made income tax payments of \$18 million compared to payments of \$42 million for the six months ended June 30, 2012.

In the second quarter of 2012, we generated \$293 million from the issuance of 6.0% Senior Notes, offset by \$141 million used to redeem the 6.375% U.S. Senior Notes and \$55 million used to acquire Siemens Laserworks and Alberta Industrial Metals.

The balances disclosed in our condensed consolidated cash flow statements are adjusted to remove the non-cash component related to foreign exchange rate fluctuations impacting inventory, accounts receivable, accounts payable and income tax balances of our U.S. operations.

FREE CASH FLOW

<i>(millions)</i>	Quarters Ended June 30		Six Months Ended June 30	
	2013	2012	2013	2012
Cash from operating activities				
before non-cash working capital	\$ 31.4	\$ 33.8	\$ 63.8	\$ 74.9
Purchase of property, plant and equipment	(7.4)	(8.8)	(14.0)	(20.7)
	\$ 24.0	\$ 25.0	\$ 49.8	\$ 54.2

We believe that free cash flow may be useful in assessing our ability to pay dividends, reduce outstanding debt and fund working capital growth. Free cash flow is a non-GAAP measure regularly used by investors and analysts to evaluate companies.

CASH, DEBT AND CREDIT FACILITIES

Debt

<i>(millions)</i>	June 30, 2013	Dec. 31, 2012
Long-Term Debt		
6.0% \$300 million Senior Notes due April 19, 2022	\$ 294	\$ 293
7.75% \$175 million Convertible Debentures due September 30, 2016	160	158
Finance lease obligations, maturing 2014 to 2017	4	5
	458	456
Current portion	(2)	(2)
	\$ 456	\$ 454

Our Convertible Debentures have been split between debt and equity. The amount allocated to equity represented the valuation of the holders' option to convert the Convertible Debentures into common shares. The fair value adjustments on the cash conversion feature were treated as a derivative prior to the amendment of the Trust Indenture in December 2010. The debt allocated to equity is accreted as a charge through interest expense over the life of the debentures.

Cash and Bank Credit Facilities

<i>As at June 30, 2013 (millions)</i>	Russel Metals Facility	U.S. Subsidiary Facility	Total
Bank loans	\$ (33)	\$ -	\$ (33)
Cash net of outstanding cheques	165	6	171
Net cash (borrowings)	132	6	138
Letters of credit	(16)	(1)	(17)
	\$ 116	\$ 5	\$ 121
Facilities			
Borrowings and letters of credit	\$ 202	\$ 32	\$ 234
Letters of credit	50	-	50
Facilities availability	\$ 252	\$ 32	\$ 284
Available line based on borrowing base	\$ 252	\$ 32	\$ 284

We have a credit facility with a syndicate of Canadian and U.S. banks totaling \$252 million which was extended to June 24, 2014 during the second quarter of 2011. In August 2013, this facility was amended and increased to \$325 million, certain fees were reduced and the term extended to June 24, 2017.

The new syndicated facility consists of availability of \$275 million under Tranche I to be utilized for borrowings and letters of credit and \$50 million under Tranche II to be utilized only for letters of credit. Letters of credit are issued under the \$50 million Tranche first and additional needs are issued under the \$275 million Tranche. The borrowings and letters of credit are available on a revolving basis, up to an amount equal to the sum of specified percentages of our eligible accounts receivable and inventories, to a maximum of \$325 million. As of June 30, 2013, we were entitled to borrow and issue letters of credit totaling \$252 million under this facility. At June 30, 2013 and December 31, 2012, we had borrowings of US\$31 million and US\$37 million respectively under this facility. At June 30, 2013, we had letters of credit of \$16 million compared to \$37 million at December 31, 2012.

In July 2013, we renewed our U.S. subsidiary facility with an expiry of July 2014. The maximum borrowings, including letters of credit, under the U.S. subsidiary's new facility are US\$20 million. At June 30, 2013, this subsidiary had no borrowings and had letters of credit of US\$1 million. At December 31, 2012, this subsidiary had no borrowings and had letters of credit of US\$20 million.

With our cash, cash equivalents and our bank facilities we have access to approximately \$371 million of cash based on our June 30, 2013 balances. The use of our bank facilities has been predominantly to fund working capital requirements, acquisitions and trade letters of credit for inventory purchases. These lines may be used to support increased working capital needs when volumes and steel prices increase.

CONTRACTUAL OBLIGATIONS

As at June 30, 2013, we were contractually obligated to make payments as per the following table:

<i>Contractual Obligations</i>	Payments due in				Total
	2013	2014 and 2015	2016 and 2017	2018 and thereafter	
<i>(millions)</i>					
Accounts payable	\$ 366.5	\$ -	\$ -	\$ -	\$ 366.5
Bank loans	32.6	-	-	-	32.6
Debt	-	-	174.9	300.0	474.9
Long-term debt interest	15.8	63.2	49.6	81.9	210.5
Finance lease obligations	1.3	2.1	0.8	-	4.2
Operating leases	9.8	30.6	19.3	26.8	86.5
Total	\$ 426.0	\$ 95.9	\$ 244.6	\$ 408.7	\$ 1,175.2

As part of the purchase consideration for Apex Distribution we agreed to pay additional consideration during the next five years based on earnings before interest and taxes and return on net assets. The fair value of this consideration was \$45 million at June 30, 2013. The obligation was increased by \$3 million in 2013 related to the change in fair value. This amount will be reviewed quarterly and adjusted through income for increases or decreases in the liability. As the fair value includes a discount related to future payments, we estimate the change in fair value on the Apex Distribution acquisition, which will be recorded as other finance expense, to be \$6 million in total for 2013 of which \$3 million has been recorded in the first half of 2013.

We have obligations related to multiple defined benefit pension plans in Canada, as disclosed in Note 14 of our 2012 consolidated financial statements. During the second quarter of 2013 we contributed \$1 million to these plans. We expect to contribute approximately \$3 million during the remainder of the year. The defined benefit obligations reported in the financial statements use different assumptions than the going concern actuarial valuations prepared for funding. In addition, the actuarial valuations provide a solvency valuation, which is a valuation assuming the plan is wound up at the valuation date. Our funding obligations reported would increase by \$6 million on a solvency basis and thus additional funding could be required based on solvency if the plans were wound up. We estimate the impact of a change in the discount rate on the solvency obligation would be similar to that disclosed in Note 14.

We have disclosed our obligations related to environmental litigations, regulatory actions and remediation in our Annual Information Form. These obligations relate to previously divested or discontinued operations and do not relate to the metals distribution business. During the second quarter of 2013, an agreement was reached with the purchasers of one of these businesses whereby \$2 million was paid into escrow to fund remediation activities in return for an indemnification for any remediation expense beyond that amount.

OFF-BALANCE SHEET ARRANGEMENTS

Our off-balance sheet arrangements consist of the letters of credit disclosed in the bank credit facilities table and operating lease obligations disclosed in the contractual obligations table.

ACCOUNTING ESTIMATES

The preparation of our financial statements requires management to make estimates and judgements that affect the reported amounts. On an ongoing basis, we evaluate our estimates, including those related to bad debts, inventory net realizable value and obsolescence, useful lives of fixed assets, fair values, income taxes, pensions and benefits obligations, guarantees, decommissioning liabilities, contingencies, contingent consideration, litigation and assigned values on net assets acquired. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Our most significant assets are accounts receivable and inventories.

Accounts Receivable

An allowance for doubtful accounts is maintained for estimated losses resulting from the inability of our customers to make required payments. Assessments are based on aging of receivables, legal issues (bankruptcy status), past collection experience, current financials or credit agency reports and the experience of our credit personnel. Accounts receivable which we determine to be uncollectible are reserved in the period in which the determination is made. If the financial condition of our customers was to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. Our reserve for bad debts at June 30, 2013 approximates our reserve at December 31, 2012. Bad debt expense for the second quarter of 2013 as a percentage of revenue approximates that of 2012.

Inventories

We review our inventories to ensure that the cost of inventories is not in excess of its estimated net realizable value and for obsolete and slow moving product. Inventory reserves or write-downs are recorded when cost exceeds the estimated selling price less cost to sell and when product is determined to be slow moving or obsolete. The inventory reserve level at June 30, 2013 was \$1 million higher than the level at December 31, 2012.

Other areas involving significant estimates and judgements include:

Income Taxes

We believe that we have adequately provided for income taxes based on all of the information that is currently available. The calculation of income taxes in many cases requires significant judgement in interpreting tax rules and regulations, which are constantly changing. Our tax filings are also subject to audits, which could materially change the amount of current and future income tax assets and liabilities. Any change would be recorded as a charge or reduction in income tax expense.

Business Combinations

We review the fair value of assets acquired for acquisitions. Where we deem it appropriate we hire outside business valuers to assist in the assessment of the fair value of property, plant, equipment and intangibles of acquired businesses. The assessment of fair values requires significant judgement including the contingent consideration which is fair valued quarterly.

Employee Benefit Plans

Our actuaries perform a valuation, at least every three years, for each defined benefit plan to determine the actuarial present value of the benefits. The valuation uses management's assumptions for the interest rate, rate of compensation increase, rate of increase in government benefits and expected average remaining years of service of employees. While we believe that these assumptions are reasonable, differences in actual results or changes in assumptions could materially affect employee benefit obligations and future net benefit plan costs. We account for differences between actual and assumed results by recognizing differences in benefit obligations and plan performance immediately in other comprehensive income.

We had approximately \$85 million in plan assets at June 30, 2013, which is \$1 million less than the December 31, 2012 plan assets. The interest rate at June 30, 2013 was 4.5% which is 0.5% higher than the interest rate at December 31, 2012 resulting in a reduction of the obligation of \$7 million.

CONTROLS AND PROCEDURES

Disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is gathered and reported to senior management on a timely basis so that appropriate decisions can be made regarding public disclosure.

The purpose of internal controls over financial reporting as defined by the Canadian Securities Administrators is to provide reasonable assurance that:

- (i) financial statements prepared for external purposes are in accordance with the Company's generally accepted accounting principles,
- (ii) transactions are recorded as necessary to permit the preparation of financial statements, and records are maintained in reasonable detail,
- (iii) receipts and expenditures of the Company are made only in accordance with authorizations of the Company's management and directors, and
- (iv) unauthorized acquisitions, uses or dispositions of the Company's assets that could have a material effect on the financial statements will be prevented or detected in order to prevent material error in financial statements.

The President and Chief Executive Officer and the Executive Vice President and Chief Financial Officer have caused management and other employees to design and document our disclosure controls and procedures and our internal controls over financial reporting. The design and evaluation of internal controls was completed using the framework and criteria established in "Internal Control – Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In accordance with National Instrument 52-109 we have limited our scope for reporting on disclosure controls and procedures and internal controls over financial reporting during the first year of acquiring Apex Distribution.

Apex Distribution was a private company prior to our acquisition on November 8, 2012 and does not have documented internal controls and lacks appropriate controls in its computer system to ensure all transactions are recorded in accordance with our generally accepted accounting principles. We are working with Apex Distribution's management to add appropriate manual and computer controls and document the internal control processes.

No changes were made in our disclosure controls or our internal control over financial reporting at the non-Apex Distribution operations during the second quarter of 2013 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Summary Financial Information - Apex Distribution

*For the six months ended June 30, 2013
(millions)*

Revenue	\$ 217
Earnings before interest and taxes	17

*As at June 30, 2013
(millions)*

Current assets	\$ 157
Current liabilities excluding contingent consideration	(41)
Goodwill and intangibles	181
Other non-current assets	15
Deferred income tax liability	(17)
Contingent consideration	(45)
Other non-current liabilities	(1)

The line items that could be affected by this lack of appropriate controls at Apex Distribution operations are revenue, earnings before interest and taxes, current assets and current liabilities excluding contingent consideration.

VISION AND STRATEGY

The metals distribution business is a segment of a mature, cyclical industry. The use of service centers by both manufacturers and end users of steel continues to grow. This is evidenced by the growth in the percentage of total steel shipments from steel producers to service centers in the last five years. As the distribution segment's share of steel industry shipments continues to grow, service centers such as ours can grow their business over the course of a cycle.

We strive to deal with the cyclical nature of the business by operating with the lowest possible net assets throughout the course of a cycle. This intensive asset management reduces borrowings and therefore interest expense in declining periods in the economic cycle. This in turn creates higher, more stable returns on net assets over the course of the cycle. Our conservative management approach creates relatively stronger trough earnings but could cause potential peak earnings to be somewhat muted. Management believes that this strategy will result in higher profits throughout a cycle and we will have average earnings over the full range of the cycle in the top deciles of the industry.

Growth from selective acquisitions is also part of our strategy. We focus on investment opportunities in metals businesses that have strong market niches or provide mass to our existing operations. New acquisitions could be either major stand-alone operations or ones that complement our existing operations. We continue to review opportunities for acquisitions.

We believe that the steel-based pricing cycle will continue to be short and volatile, and a management structure and philosophy that allows the fastest reaction to changes that affect the industry will be the most successful. We will continue to invest in our business systems to enable faster reaction times to changing business conditions. In addition, management believes the high level of service and flexibility provided by service centers will enable this distribution channel to capture an increasing percentage of total metal revenues to end users, allowing for increased growth within the sector.

RISK

The timing and extent of future price changes from steel producers and their impact on us cannot be predicted with any certainty due to the inherent cyclical nature of the steel industry. Demand for our products is returning to pre-2009 levels in all metals service center regions other than Ontario and the U.S. Demand has increased year over year since 2009 other than in the first half of 2013 where it declined by approximately 7% from 2012. We will continue to make structural changes where necessary based on demand levels. Our Apex Distribution acquisition in 2012 increased our exposure to the Western Canadian oil and gas segment. We believe that this continues to be an area of growth; however, our exposure to the cyclicity of oil and gas pricing has increased. Management believes the acquisition of Apex Distribution provides a more stable stream of revenues and earnings for the energy products segment. Our Annual Information Form includes a summary of risks related to our business.

OUTLOOK

We believe that the second half will show improvement over the first half. We expect to experience stable volumes and pricing in our metals service centers and steel distributors segments and improved volumes in our energy products segment during the seasonally stronger fall period.
